Optimize and Secure your Hybrid Cloud

Proactively detect and mitigate configuration issues and security risks with a patented solution for real-time, actionable insights: Runecast Analyzer.

FULL VISIBILITY OF ISSUES IN YOUR HYBRID CLOUD AND OPERATING SYSTEMS

Runecast Analyzer continuously scans your configuration and logs against known issues, security standards, VMware HCL, vendor best practices and more. We help stabilise and secure your mission-critical IT Operations Management (ITOM), including your Security Configuration Assessment (SCA) and Cloud Security Posture Management (CSPM). VMSAs/CVEs display on the main dashboard to make vulnerability management simple. Ensure consistency and end config drift with Configuration Vault. Generate custom remediation scripts. Validate host hardware, BIOS, drivers and firmware against the HCL (for current installed versions and upgrade simulation). See issues and historical data for AWS, Azure, Kubernetes, Linux Red Hat, Microsoft Operating Systems, and VMware.

SECURITY COMPLIANCE

Provides mapping of security controls and requirements to technical checks, detailed historical data and remediation capabilities, evaluating your security compliance with:

- BSI IT-Grundschutz
- CIS Benchmarks
- Cyber Essentials
- DISA STIG
- Essential 8
- GDPR
- HIPAA
- ISO 27001
- NIST
- PCI-DSS
- VMware Security Configuration Guide
- Custom profiles (for internal standards)

 REGARDLESS WHERE YOU RUN IT, YOU MAINTAIN CONTROL OF YOUR DATA

Running securely on your own infrastructure, Runecast helps you automate security compliance checks, performance analysis, vulnerability, assessment and patch management with insights into what is happening in your multi and hybrid-cloud and on-premises. No sensitive company, employee or customer data needs ever leave your control.

INCLUDES ENTERPRISE CONSOLE

ENDORSED BY OUR CUSTOMERS

“It took away a lot of the pressure from firefighting mode. It shows you how you should have done things in the first place, so it’s also training people and giving them the confidence to do something they may not have known how to do before. With Runecast, we can now look at one screen and have the visibility and transparency to know what we are working on and why.”

Henderson Alleyne
Head of IT & Telecoms, DHU Health Care

“A vital tool for maintaining uptime for your virtual environment”

Cloud Services Manager

“Runecast gives you the information you need to prevent potential and dangerous issues saving a lot of time and keeping the environment healthy”

System Engineer

“We designed this platform so sysadmins never have to waste valuable time identifying, diagnosing or searching for error codes ever again”

Forward-thinking organizations that rely on Runecast Analyzer
Runecast Add Value & Stability to VMware & AWS Hybrid Cloud

Runecast Analyzer helps teams to stabilize availability and ensure security compliance. Our customers often report ROI from the very first scan, plus major ongoing time savings that enable IT teams to focus on other areas and support business growth.

Full Visibility over Your Hybrid Cloud

Runecast Analyzer helps teams with a simpler transition to hybrid and multi-cloud environments. Running securely in your infrastructure, it provides insights into what is happening, both in the cloud and on-site. Automate the reporting of support tickets with our ServiceNow integration.

SUPPORTED SERVICES

- Amazon Web Services (AWS) Cloud
- Kubernetes – Amazon EKS, Microsoft AKS, Google GKE, VMware Tanzu, HPE Ezmeral Container Platform
- Linux Red Hat
- Microsoft Azure Cloud
- Microsoft Windows
- VMware – vSphere, vSAN, NSX-V, NSX-T, Horizon and VMware Cloud Director, SAP HANA (on vSphere), PureStorage (on vSphere), vSphere on Nutanix

By the numbers

90% Savings in upgrade compatibility tracing effort
- FLEXdata

90% Time savings over previously troubleshooting issues reactively
- Near East Bank

75% Reduction of outages and issues
- NCC Media

100% Delivery of uptime to their cloud customers
- ONI PLC

Gain real-time IT Operations Management (ITOM) and security compliance insights
- Monitor, secure and troubleshoot your hybrid and multi-cloud for proactive Cloud Security Posture Management (CSPM)
- Proactively discover previously unknown issues
- Mitigate risk of data breaches
- Maintaining audit-readiness for security compliance
- Have performance analysis, vulnerability assessment, and patch management – all in one place
- See the future with upgrade simulations and the past with detailed history
- Easy deployment – up and running in minutes
- Offline repository limits exposing the internal network to the internet
- Regular updates combined with updates as soon as new issues or standards are released
