

# How Quickly Can Admin Staff Book a Job?

## With and Without Intelligent Scheduling

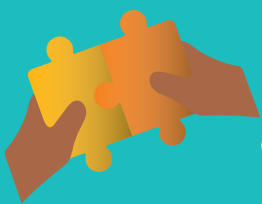

### WITHOUT VS WITH

**1**  
Work out which engineers could handle this type of job

**2**  
Scour your diary for a suitable gap to fit the job

**3**  
Try to work out if the driving time between the jobs will work out using Google Maps

**4**  
Make sure that appointment matches the engineer's shift times

**5**  
Customer says "I can't do that week"

**6**  
Repeat the process... whilst the customer waits

**10 MIN**

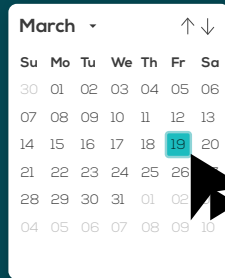

**1**  
Add the job against the customer in the system

**2**  
Click to book a 'suggested appointment'

**3**  
Within seconds, see the most efficient slots available, factoring job length and driving time

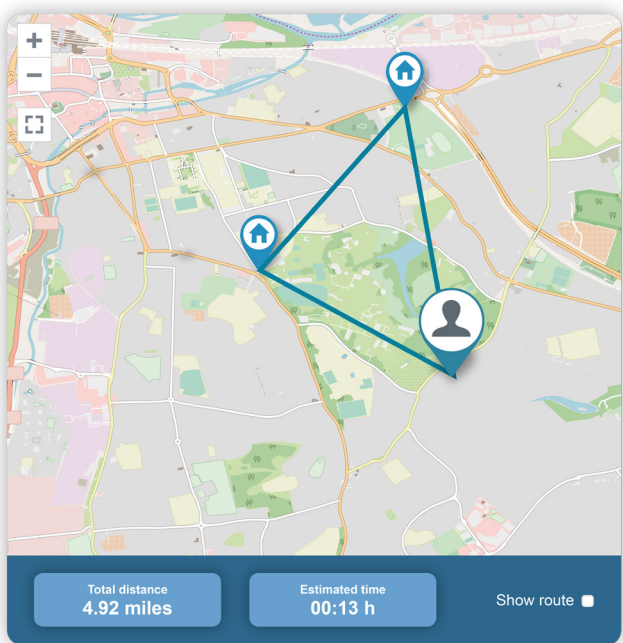

**4**  
Only engineers with the correct skills and shift availability are shown

**5**  
Customer says "I can't do that week"

**6**  
Simply change the date to see new, efficient time slots in moments

**2 MIN**

★ **They say that seeing is believing!**

So, to see for yourself how you can **save time** and **fit more jobs into each day** try Commusoft's Intelligent Scheduling Game, below!

Thanks to our powerful route optimisation algorithm, you can rely on Commusoft to help you find the most efficient date & time, and even the best engineer for every job.
