Intelligent Scheduling:
How Quickly Can Admin Staff Book a Job?

With and Without Intelligent Scheduling

WITHOUT VS WITH

WITHOUT

1 Work out which technicians could handle this type of job

2 Scour your schedule for a suitable gap to fit the job
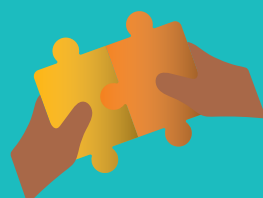

3 Try to work out if the driving time between the jobs will work out using Google Maps

4 Make sure that appointment matches the technician's shift times

5 Customer says "I can't do that week"

6 Repeat the process... whilst the customer waits

10 MIN

WITH

1 Add the job against the customer in the system

2 Click to book a 'suggested appointment'

Book

3 Within seconds, see the most efficient slots available, factoring job length and driving time
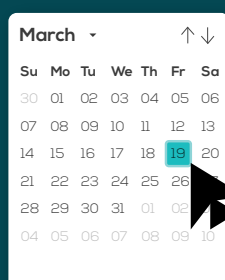

4 Only technicians with the correct skills and shift availability are shown
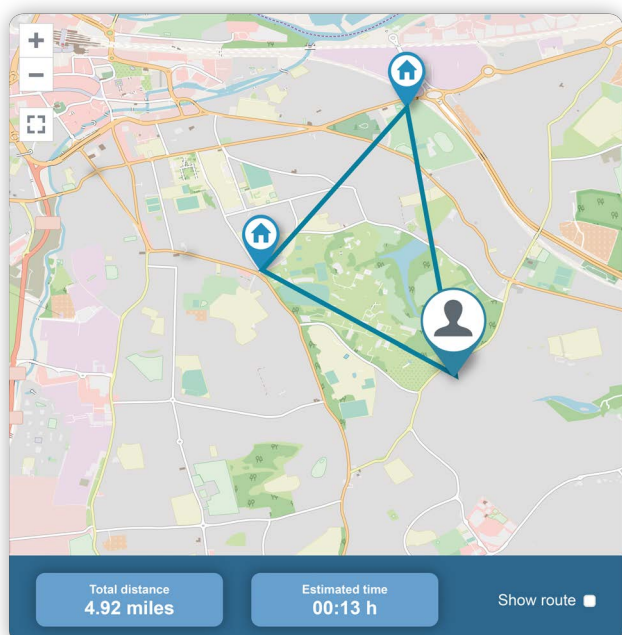

5 Customer says "I can't do that week"
