Online Booking:

How Quickly Can Customers Arrange a Job?

Scheduling online without automation software vs. scheduling with

Does this sound familiar:

'Our team receives so many emails for quotes, jobs, invoices... Between phone calls, emails, and more, we can't keep up: it's all so time consuming!'

WITHOUT **VS** WITH

WITHOUT	WITH
1 Customer calls to book a job (likely waiting on hold)	**1** Using a portal, have customers make bookings without ever picking up the phone
2 Admin manually searches calendars to see which technicians are available	**2** Customers view available options for suggested appointments
3 They check available calendars for suitable slots to fit in the job	**3** Customers only see slots for times relevant to the job & details selected
4 Work out if travel time between jobs is efficient, using Google Maps	**4** Nothing fits? Easily scroll through to check other available dates
5 Check if appointments match a technician's shift. If not: start again!	**5** Date confirmed! Customers get an automatic confirmation instantly
6 They suggest a slot, only for the customer to say "That won't work". Then the process repeats...	**6** Booking complete!
✗ **10+ MIN**	✓ **2 MIN**
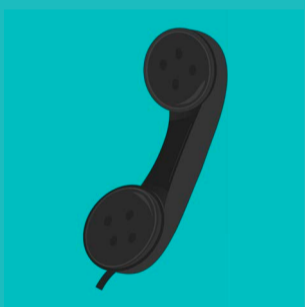

Secure jobs with zero-touch admin, all thanks to an online booking portal!

Take on more work, but with the confidence that everyone - from technicians, to admins, to customers - is always in the know!

Don't waste time: try the Commusoft Booking Portal Demo for yourself and see how it can transform the way you win more work.
