

PLANT OPERATIONS AND SERVICES

Responsible Full Service That Provides Peace of Mind

RELIABLE, TENURED, CERTIFIED ENGINEERS AND TECHNICIANS

WestTech Plant Operations and Services professionals eliminate the challenge of finding and hiring the right people with the right training and skills. As an equipment manufacturer and solutions provider, WestTech is uniquely qualified to optimize and operate water and wastewater treatment equipment.

Our professionals are cross trained on every aspect of the wastewater treatment system. They have full access to equipment experts and engineers to help troubleshoot and optimize equipment. With WestTech Plant Operations and Services, organizations have the peace of mind that comes with knowing they won't suffer the financial and reputational costs of noncompliance.

THE WESTECH ADVANTAGE

Single point of responsibility for overall plant operation

Turnkey solutions at monthly or per-gallon rates

Effluent and safety compliance

Liability protection for quality and discharge limits

Optimal system operations

Complete management of plant staffing, including on-site training

A flexible, personalized approach

Quick-to-respond experts on hand

Mobile/Rental solutions available

Remote monitoring

Regulatory Compliance Requires More Than Equipment

Ever-restrictive effluent guidelines require updated technologies, which often entail hiring and training qualified personnel. Given that a large percentage of today's operators have less than two years of experience, staffing to meet regulatory requirements can pose a significant challenge.

Contact WesTech to find out how our Plant Operations and Services team can optimize your system and lift the burden of compliance from your organization's shoulders.
