

If you are a Full Stack Engineer with strong JavaScript (PostgreSQL, React, NodeJS) experience, please read on!

Job Title: Full Stack Engineer - JavaScript (PostgreSQL, React, Node.js)

Job Location: Minneapolis-Saint Paul, MN or Remote

Job Description

Our team at Mesamore is small but mighty. We are focused on solving the challenges inherent to creating a brand-new platform to help provide exposure to artisan, small businesses and create a quality customer experience for our user groups. We're seeking a full stack engineer who will take end-to-end ownership of this project and stack and think creatively about how to craft the best experience for our end users.

Our ideal candidate has experience building products across the stack and a firm understanding of web frameworks, APIs, databases, and multiple back end languages. You'll be working closely with both the company founder and the UI/UX developer to implement a stellar product.

This is a contract role; the terms of the contract will be negotiated upon hiring. Equity share arrangements or a working/hands-on Tech Leads or CIO position is possible for the right candidate.

Objectives of this Role

- Work across the full stack, building highly scalable distributed solutions that enable positive user experiences and measurable business growth
- Develop new features and infrastructure development in support of rapidly emerging business and project requirements
- Assume leadership of new projects from conceptualization to deployment
- Ensure application performance, uptime, and scale, maintaining high standards of code quality and thoughtful application design
- Work with agile development methodologies, adhering to best practices and pursuing continued learning opportunities

Responsibilities

Our new team member will help build, test and maintain our website built on React, Node.js, and PostgreSQL, supplemented by RXJS and other technologies.

- Completing programming and designing changes and improvements to our application
- Debugging any potential problems that come up and take note of areas that could be a problem down the line
- Writing clean code, coming up with new ideas, run tests on new code
- Managing our databases and routes in PostgreSQL.

Candidates will have the option to work remotely or from our office in Saint Paul, MN.

Required Skills and Qualifications

We are looking for someone with 1-2 years of experience in the following skills:

- JavaScript (ES5 / ES6)
- React.js or similar Javascript frontend framework
- RESTful API development
- Node.js
- PostgreSQL
- CSS / SCSS

Preferred Qualifications

- Interest in learning new tools, languages, workflows, and philosophies
- Stellar interpersonal communication skills
- Professional certifications

If you are a Full Stack Engineer looking to join a great team, send a current copy of your resume to mesamore.hiring@gmail.com for immediate consideration!
