

uvex supravision THS - Anti-fog protection

uvex supravision THS - anti-fog technology like no other. Engineered to work with other essential PPE.

uvex coatings keep your vision clear - all day

Wearing safety eyewear while also using a face shield, face mask, and/or respirator can cause the lenses to fog up from low air circulation or diverted airflow, leading to severe or continuous fogging issues. To ensure your safety eyewear remains fog-free, superior anti-fog technology is key. uvex industry leading supravision anti-fog coatings helps keep your vision clear in these specific situations, uvex supravision THS.

uvex pheos s (9192-230)

uvex pheos cx2 (9198-400)

uvex sportstyle (9193-425)

Some of uvex's most popular safety eyewear with uvex supravision THS coating.

Unrivalled protection

Anti-fog on both sides - uvex supravision THS

Coated lenses have advanced anti-fog performance (at least 30 seconds) on both sides. The anti-fogging properties are permanent, even after repeated cleaning. Dual-coated lenses are best suited to areas with high humidity.

uvex supravision THS - has been specifically engineered to meet the unique conditions of the local environment. It is the only lens on the market that incorporates a hydrophobic coating overlaid onto a permanent hydrophilic coating to ensure prolonged anti-fog performance

How uvex supravision THS anti-fog beats the competition:

Permanent anti-fog technology

Chemically engineered to not wash off, uvex's anti-fog coatings are fundamentally different from competitors – absorbing moisture droplets as they hit the lens to eliminate fogging quickly and efficiently, whereas most competitive anti-fog coatings are detergent-based and wash off over time.

1. Moisture condenses on the lens
2. Moisture spreads then absorbs into the coating
3. The lens does not fog

Dual-coated lens for constant movement between areas of different temperature and humidity

uvex hydrophilic coatings - moisture is absorbed into the coating to eliminate fogging. This is fundamentally different from most competitive fog resistant coatings.

Issue:

Fogging inside and outside of the safety eyewear lens

Solution:

uvex supravision THS anti-fog coating on both sides of the lens
