PLASMA CUTTER

The AdvanceCut100 offers superior functionality in the Plasma cutting sector. Utilising IGBT module inverter technology and dual HF/Non HF arc starting systems, the user has the convenience of reliable high performance cutting. The AdvanceCut100 is the easy choice for your heavy duty plasma cutting needs.

- IGBT module inverter technology for smooth, stable output, increased reliability, 100% duty cycle
- Dual HF/Non HF arc starting systems for high starting reliability, or non HF start torch system for low EMF pollution.
- Digital air pressure meter for accurate and clear display of input air pressure.
- Microprocessor control system for superior & dynamic arc characteristics
- CNC interface connection
- Protected external air regulator with water trap/ filter for easy adjustment & servicing
- Euro connect torch system with safe & robust connection to machine
- Advanced Strata plasma torch with european torch head for superior cutting performance and consumable life
- Automatic pilot arc control system for increased cutting capability, especially for discontinuous cutting
- Extreme stress tested to 550v in production for rugged reliability
- Strong environmental protection against moisture, salt spray and corrosion
- High quality & over specified electronic components for durability & reliability
- Intelligent protection system protects plasma torch from damage
- Air flow manual activation switch to set & test air pressure.
