

WeldSkill 150 MIG Portable Welding Machine

The CIGWELD WeldSkill 150 MIG is a single phase compact power source designed specifically for handymen or tradesmen that require high quality welding performance. This constant voltage power source provides excellent arc performance with solid or flux cored welding wires. It is ideal for welding a wide range of materials including stainless/mild steels and aluminium (when used with appropriate consumables).

FEATURES

- **Powerful MIG welding plant designed for a broad range of applications**
- **Designed specifically for home handyman/ tradesman**
- **Excellent arc characteristics on both solid and flux cored welding wires**
- **Ideal for welding a wide range of stainless, mild steels and aluminium**

Machine Specifications

Input Voltage	240 Volts, +/- 15%
Input Frequency	50 Hz
Generator requirement	7 kVA
Output range	41 – 130 amps (150A max)
Rated Output @ Duty Cycle	130A @ 20.5V 10% Duty Cycle
Dimensions (HxWxD)	375H x 245W x 420D mm
Weight (Power Source)	20 kg

Fan Cooled for improved duty cycle & welding performance

Over Temperature Cut Out protection has been fitted to this power source

240 Volt, 15 Amp Supply Lead fitted to power source*

Maximum Mild Steel Wire Size 0.9mm Power source is suitable for 0.9mm mild steel gasless and solid welding wires*

Shielding Gas Operation This power source is suitable for use with solid MIG welding wires requiring an external shielding gas*

Gasless Operation This power source is suitable for operation with mild steel gasless welding wires*

Australian Standards Compliance This power source complies to the relevant Australian Standard, AS 60974.6-2006*

1 Year Warranty This equipment is manufactured to stringent CIGWELD quality standards and is backed by a conditional One Year warranty*

* Refer to operating manual for details
