

## EVACUATION FOOT PUMP ACCESSORY

This Foot Pump is ideal for transferring used oil and other nonflammable fluids in the shop from low-profile oil drains into a waste oil containment system. The Pump improves production and ergonomics by preventing potential injury while transferring fluids. It is perfect for the shop that handles multiple types of fluids while not utilizing a diaphragm pump for transferring fluids. The Foot Pump will siphon fluids from a variety of drain styles and capabilities.

### Features include:

- 6' suction hose 1" in diameter
- 8' discharge hose with J-Hook
- Approximately 8 strokes per gallon
- Ideal for use with JDI-17PLP
- Constructed of durable polypropylene
