DVT-PRO Single Dual Band TPMS Sensor

Dynamic DVT-PRO
315/433 MHz

Dynamic DVT-PRO Sensor with Dual Valve Technology

One (1) DVT-PRO sensor is designed to be programmed with several TPMS Tools including ATEQ, Snap-on and Dynamic DY-46 & DY-47. Dynamic DVT-PRO sensor comes with our 6-207A rubber valve and has “Dual Valve Technology” (DVT). The valve stems can easily be replaced with other Dynamic valve options shown below using the same sensor housing.

6-207A

Rubber Valve
T10 screw
Box of 15

6-225

Brushed Metal Valve
T10 screw
Box of 4

6-203

Chrome Metal Valve
T10 screw
Box of 4

6-225B

Black Metal Valve
T10 screw
Box of 4

Program the Dynamic DVT-PRO Sensor with MANY of the current TPMS Tools

European TPMS Aftermarket Replacement Valve Stems

The OEM has two different designs of replacement valve stems with their TPMS sensors, Generation I and Generation II. These can be found on OEM vehicles such as Audi, Bentley, BMW, Ferrari, Lamborghini, Maserati, Mini, Mercedes, Porsche, Rolls Royce and Volkswagen. These valve stems are color coded at the base of the stem denoting different dimensions (see table below.)

Note: Gen I and Gen II valve stems utilize a different thread pitch, therefore the service repair kits use different components and cannot be interchanged. Only use the 6-110 service kit with the Gen I valve stems, and the 6-109 with the Gen II valve stems. The information below details the difference in the valve stems and the service kits.

Generation I

Dynamic Valve Kit w/Valve Stem	Dynamic Service Kit w/Valve Stem	OEM Number	Valve Length	Coded Code noted at base of valve stem
6-220	6-110	RDV001	L = 43mm	Silver
6-221	6-110	RDV002	L = 48mm	Green
6-222	6-110	RDV003	L = 49mm	Black
6-223	6-110	RDV004	L = 51mm	Orange

T-20 screw,
35 in-lb torque

10V2 thread hex nut without shear collar, 35 in-lb torque. Note: Use only the Gen I valve stems

6-110 Service kit, 10V2 threaded hex nut, two washers, grommet, nickel plated valve core, plastic valve cap. Note: Use on Gen I valve stems only!

Generation II

Dynamic Valve Kit w/Valve Stem	Dynamic Service Kit w/Valve Stem	OEM Number	Valve Length	Coded Code noted at base of valve stem
6-240	6-109	RDV021	L = 43mm	Silver
6-241	6-109	RDV022	L = 48mm	Green
6-242	6-109	RDV023	L = 49mm	Black
6-243	6-109	RDV024	L = 51mm	Orange

M5 square head screw,
torque set by hex nut

7/16\"-18 thread hex nut with shear collar; the nut will tighten the screw and the collar will break away at 20 inlb. Continue to torque to 35 in-lb. Note: Use only on Gen II valve stems

6-109 Service kit, 7/16\"-18 threaded shear collar nut, grommet nickel plated valve core, plastic valve cap. Note: Use on Gen II valve stems only!

Domestic TPMS Aftermarket Replacement Valve Stems

The Dynamic aftermarket DVT-PRO Replacement Valve Stem options. The default rubber snap-in valve, the brushed aluminum clamp-in valve, the chrome clamp-in valve and the black aluminum clamp-in valve.

All four valves are compatible with the DVT-PRO sensor. (See compatible valves below.)

Replacement Valves for the DVT-PRO and Specific Applications

6-207A

Applications:

Chrysler, Dodge, Ford, GM, Hummer, Jeep, Mazda,
Mercury, Subaru, Suzuki

Cross-reference:

20008, 20018, VS950, 92-0145

Optional Valves for 6-207A

6-225

**Brushed Aluminum
Optional Replacement
Valve for 6-207A**

6-203

**Chrome Optional
Replacement Valve
for 6-207A**

6-225B

**Black Aluminum
Optional Replacement Valve
for 6-207A**

NEW! Replacement Valves for Specific TESLA Applications

6-284

Tesla Brushed Metal BLE Valve

6-284B

Tesla Black Metal BLE Valve

6-284G

Tesla Graphite Metal BLE Valve

- Compares To: VS490
- Tesla Models shown below using Bluetooth TPMS
- Rim Hole Compatibility: 0.453"
- Maximum Cold Inflation Pressure: 200 psi
- Nut Torque: 6.0Nm
- Screw Torque: 3.0Nm

Year	Make	Model
2020-23	Tesla	Model 3
2021-23	Tesla	Model S / S Plaid
2021-23	Tesla	Model X / X Plaid
2020-23	Tesla	Model Y

All DVT-Sensors including the DVT-PRO are supplied with a rubber snap-in valve (part number 6-207A). The rubber snap-in valve stems are designed for use in applications up to a maximum of 80 psi (5.51 bar, 551 kPa) cold inflation pressure and 115 MPH (185 km/h) max speed.

For vehicle applications requiring higher than 80 psi cold inflation pressure and/or higher than 115 MPH speed rating, the valve stem **MUST** be changed to the aluminum clamp-in stem (part number 6-225).

For a question on a TPMS application, please call Technical Support at (800) 805-4058.

DVT Rubber Snap-In Valve Stem

- Part Number: **6-207A**
- Max cold inflation pressure: 80 psi (5.51 bar, 551 kPa)
- Max speed rating: 115 MPH (185 KPH)
- T-10 screw torque specification: 11.5 in-lbs (1.3 Nm)

Step 1 – Remove rubber valve stem

Step 2 – Keep transmitter

Step 3 – Install 6-225 metal clamp-in valve stem

DVT Metal Clamp-In Valve Stem

- Part Number: **6-225, 6-203, 6-225B**
- Max cold inflation pressure: 120 psi (8.27 bar, 827 kPa)
- Max speed rating: 155 MPH (249 km/h)
- T-10 screw torque specification: 11.5 in-lbs (1.3 Nm)
- Nut torque: 35 in-lbs (4.0 Nm)

DVT-Sensor Snap-In Valve Stem Installation Procedure

TPMS snap-in valve stems require a tighter wheel fit than traditional snap-in valves. The tighter fit is necessary to retain the additional weight of the attached sensor and may require slightly more force than normal to install and seat the valve. This bulletin outlines the recommended procedure for installing a TPMS snap-in valve. Failure to follow this procedure can result in broken, bent or unseated valves.

Important factors for a proper valve installation are to use a lubricant on the stem to reduce the friction and to pull the valve straight into the rim hole so the leading edge of the valve can pull through the rim hole.

For a question on a TPMS application, please call Technical Support at (800) 805-4058.

Procedure:

1. Many sensors can be installed with the stem valve attached. However, it may be necessary on certain wheels to remove the sensor from the valve stem before installation. If the sensor interferes with the wheel, then stop and remove the sensor so that the valve stem is free to align with the hole. Reattach the sensor after the valve stem is installed.
2. **Lubricate** the leading edge of the valve stem with a soapy water solution or other lubricant such as tire mounting paste. **DO NOT** use petroleum based products such as motor oil or WD-40.
3. **Pull directly in-line** with the valve stem axis.

PREFERRED METHOD	NOT ACCEPTABLE – X
Use standard puller with rubber or wood block, recommended Dynamic DY-160 valve puller shown in photo	Pulling the valve on an angle may either bend and/or tear the stem.
	

4. Verify that the stem is fully snapped into the rim home. The bulb end must be fully seated against the inside of the wheel. Re-pull on stem if necessary to fully seat.

PREFERRED METHOD	NOT ACCEPTABLE – X
