## DRAIN PANS, FUNNELS, DISPENSERS

### 6-Quart Oil Dispenser - No. 19732

Translucent white (see-through) polyethylene material enables the user to read the liquid level on the container.

Marked in both quarts and liters. The flexible 8" pouring spout enables easy transfer of liquid. The spout is white.

### Threaded Oil/Transmission Funnel - No. 19802

#### Hands-Free Filling on Threaded Valve Cover Openings.

Two-piece design can be used separately or threaded together for a long super funnel. The larger section screws into threaded oil filler openings, found on many Ford pickups and Dodge, Jeep & Chrysler cars, mini vans & SUVs. This holds the funnel upright for quick, mess free oil fills. Also works on some Honda, Acura and Nissan vehicles. The diameter of the smaller funnel is narrow enough to fit even the smallest applications including transmission filler holes.

### 5-Gallon Radiator Pan - No. 11845

For easy transfer of liquids. High-density polyethylene material is resistant to chemicals and solvents, and is easy to clean.

1" wide diameter spout for quick and easy pouring. The anti-splash lip and baffles help prevent spilling when carrying or pouring. Comes with large, easy-grip handles.
