

Cool Roof Color:

Shingle XD in Antique Chestnut CC is Available to Order Today

The roof of a building is exposed to the sun more than any other part of the structure, making the material a critical factor when it comes to energy efficiency.

Engineered to reflect heat from the sun, DECRA's line of Cool Roof Colors are certified by the Cool Roofing Rating Council (CRRCC) to have high solar reflectance and thermal emittance properties that reduce energy costs.

Shingle XD Antique Chestnut CC Scores

Shingle XD (shown below in Antique Chestnut) is a CRRCC-approved cool roof color. The CRRCC aged this panel for three years, testing its solar reflectance and thermal emittance, resulting in:

- ▶ SRI: 22
- ▶ Solar Reflectance: 0.22
- ▶ Thermal Emittance: 0.90

Get Started With DECRA's Cool Colors

There are no special tools to get started. Simply contact DECRA Metal Roofing to get started installing our line of premium roofing products. In doing so, you'll:

- ▶ Get trained on the installation process.
- ▶ Set yourself apart from the competition.
- ▶ Connect with homeowners who value energy savings.
