

Pre-Season Checklist – Kiwifruit 2021

GENERAL

- ✓ **“OK Until” (Expiry ISO)** settings per Purchase Pool in *KiwiPlus* or *FreshCool*.
 - Please make sure that these values are set Prior to packing.

The image shows two screenshots of a software interface. The left screenshot is titled 'Purchase pools' and shows a form with fields for 'Purchase pool', 'Classes', 'Varieties', 'Grow Methods', 'Sizes', 'Outturn Repack Rate', 'Outturn Dump Rate', and 'OK After Pack', 'OK After UG Pack', and 'OK After ReWork'. The right screenshot is titled 'Edit Purchase Pool' and shows a form with fields for 'Code', 'Description', 'Variety', 'Class', 'Growing Method', 'Fruit Sizes', 'OK Until (Packings)', and 'Extend Expiry Date (SPOI & Repack) by'. Both screenshots have a red box highlighting the 'OK After Pack' field in the left one and the 'OK Until (Packings)' field in the right one.

- ✓ Please check **Condition Check Samples** and **ECPI Sample Rates**.
 - *KiwiPlus* - These values will be copied over from the 2020 database but check and update them if needed.
 - *FreshCool* - These values will need setting up if using *FreshCool* for the first time this season.
- ✓ Update your Materials via a Material RFI before you start packing!
 - *FreshCool* - Please remember to pull master data **into FreshPack** from *FreshCool* when required.
 - *KiwiPlus* - Facilities still using *KiwiPlus*, master data needs to be pushed **to Kiwiplus** from *FreshPack*.
- ✓ Please remember to request and import **pallet card** and **UFI Batch numbers** before you start packing.
 - **NOTE** – *FreshPack*, *FreshCool* and *Kiwiplus* require separate pallet number ranges for packing or re-palletising to new pallets.
- ✓ Exclusive Access to the *Kiwiplus* Database
 - *KiwiPlus* - Consider all the different applications that are mining or replicating data. These applications will need to be closed prior to a pack and re-index. E.g. *FreshSense*, *FreshPack*, *FreshQuality*, *FreshInsights*, Auto Replication, and Scheduled Tasks.
