

# AUTOMATED STORAGE & RETRIEVAL SYSTEMS

---

In all types of manufacturing and distribution centers, AS/RS aims to better manage inventory by enhancing inventory management and tracking, as well as adding the flexibility needed to meet changing business needs. An AS/RS can also help reduce stock storage costs and greatly improve warehouse efficiency. CCS is equipped to help leverage a range of AS/RS technologies in your warehouse, including crane, shuttle, carousel and robotic platforms with both mini- and unit/pallet load options.

---

## ENHANCE PROCESSES

When large volumes of inventory are required in the manufacture or distribution process, automated storage and retrieval system (AS/RS) will prosper.

## SAVE TIME & MONEY

AS/RS delivers inventory in Real Time — eliminating physical stock review time and cost, thus enabling direct access to storage goods.

## OPTIMIZE FLOOR SPACE

Increase performance and efficiency allowing you to enhance your floor space and reduce building costs.
