

ABOUT US

The Fast and Easy Intelligent Solution to Find Your Video

WHO WE ARE

Intelligent Video Solutions is a group of video technology professionals passionate about helping clients use video to advance their organization's purpose. Unified by providing outrageous customer service, our team designs, implements, and supports any size video observation and recording deployment. VALT, our flagship software, is built from the ground up to support critical end user objectives:

Capture + Observe

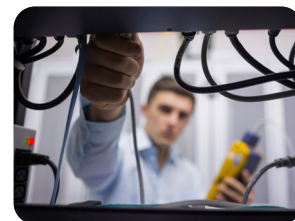

VALT features an easy-to-use, intuitive browser interface to observe and record HD video from any authorized device.

Review + Manage

Custom data fields, annotations and debriefing tools empower users to create and manage their own video database without extensive support.

Compliance + Security

Robust security features, extensive permission and authentication options, data encryption and audit trails meet or exceed compliance standards.

WHO WE SERVE

Simple enough for a one-room system and powerful enough for a campus-wide system with cameras in every building, VALT securely delivers a unique experience for each custom application and program on a single platform. Deploy VALT in any organization looking to improve video training, education, and research with video:

CLINICAL SKILLS

VALT optimizes staff resources, accelerates student clinician competency, and improves patient care with integrated AV capture and observation technology.

INTERVIEW RECORDING

VALT replaces labor-intensive VHS, DVD or adapted NVR technology and allows investigators to launch recordings with the click of a button and quickly find videos from any case.

SIMULATION

VALT's small hardware footprint saves time and resources, elevates audio/video quality, and supports focus on simulation objectives, without budget-crushing annual costs.

RESEARCH

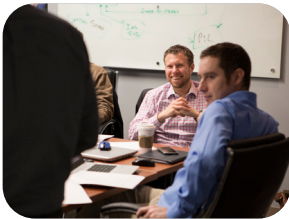

VALT enables detailed analysis and record keeping with a robust, configurable video system for research in medical, behavioral health, marketing, and product development applications.

ABOUT US

The Fast and Easy Intelligent Solution to Find Your Video

WHAT WE OFFER

IVS has delivered intelligent video solutions for more than 15 years. We are proud to be a Wisconsin based company serving customers internationally from our headquarters in Sussex, Wisconsin. We pair VALT with a portfolio of professional services:

SYSTEM DESIGN

IVS works with clients to custom design a solution based on their unique requirements. Our engineers match cameras, audio capture, and accessories to each room and facility layout.

TECHNOLOGY DEVELOPMENT + CONFIGURATION

IVS designed VALT from the ground up and maintains an aggressive product development roadmap. We pre-configure any number of IP cameras and servers to ensure smooth implementation.

AV INTEGRATION

IVS deploys technicians globally for complete turn-key installations. We also partner with local resources while providing project management, configuration, and training resources.

SUPPORT

IVS systems are covered by a robust Software Support Agreement and backed by our experienced helpdesk to provide phone, remote desktop, or onsite support services as needed.
