Manhattan, KS

**TEXAS FORENSIC NURSE EXAMINERS**

Houston, TX

**YORK COUNTY CAC**

York, PA

The forensic interview is critical in child welfare and criminal investigation.

Since the interview is often the only way to obtain crucial information it must be conducted in accordance with all local and federal regulations so law enforcement can use the statements in the justice process. A high-quality, easy to use video observation and recording system ensures these critical statements are available when needed without distracting the child or interviewer during the process.

VALT can start/stop recordings with a simple push of a button. The interview files are immediately available in the interviewer’s office to create multiple copies for law enforcement. By tagging all the interviews with relevant data they can quickly find any evidence needed for a case and run reports to share with other agencies.

KEY FEATURES

- Works with unobtrusive or covert HD IP Cameras
- Perfectly synchronized audio and video
- Secure, watermarked video files
- Bookmark important statements for quick playback
- Easy tools for clipping, redacting and exporting video
