

Fantastic news EcoVillagers!

We have finally secured our building permit approval today. This means construction of the buildings can commence immediately. And that is exactly what is happening on the ground.

The project team has been working tirelessly to prepare the site for construction and we are in a position to begin construction next week. This has been a long and sometimes frustrating journey for those of us who have been closely involved in discussions with the government's Planning Department over the past year. Needless to say, it is beginning to feel like water under the bridge as we charge ahead with our construction plans to deliver your home by June 2022 as committed in your purchase contract. The selection of finishes will be scheduled in the late May/June timeframe.

Please note that the Orchard site is an active work zone with multiple heavy equipment and workers there daily. A locked gate is now installed and we ask that you schedule your visits with Biserka at bpena@orchard.ky. We are also planning an Open House day soon so that you can be guided through the site on an upcoming Saturday. Look for an invitation for the Open House to be emailed separately.

Orchard Team
