

Krux

Solutions for Drillers

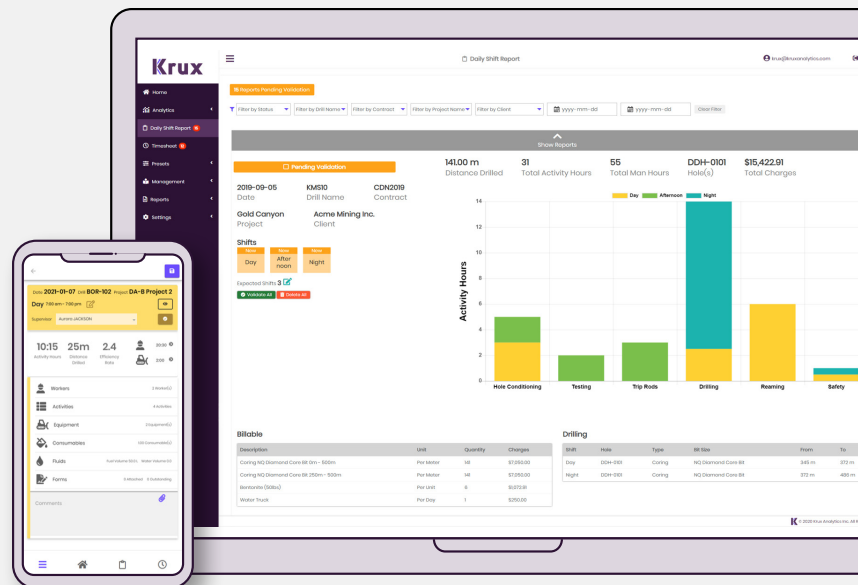

Optimize your on-site operations with a secure, digitized data set.

Krux is an enterprise-level, easy-to-use software platform that helps you capture, review, and and communicate with your clients in real time. Faster approval processes and better predictions, mean less delay on site, so you can drill down with pinpoint accuracy.

We empower your business to manage data and approvals in real-time, and move forward with confidence.

With Krux, you can:

- Enter daily drilling activities, timesheets and survey results, with or without internet access during each shift.
- Automatically submit reports to drilling supervisors and clients for approvals in real time.
- With approved reports, drillers can run payroll and invoicing in minutes, while also reducing client payment delays and invoicing discrepancies.

Turn to Krux, we turn information into insight.

Custom Plans and On-Demand Service
