

The Highest Priority

Security and Data
Integrity on Incentify

incentify
The World's Most Powerful C&I Platform

Frictionless Cloud Security With Best in Class Integrations

At Incentify, we're dedicated to bringing secure, centralized and cloud-native content services to organizations all over the world.

We embed security and resilience into every fabric of our enterprise. Core integrations with Box, Docusign, and Amazon WebServices provide quick API integrations to personalize your collaboration and workspace transforming as a seamless layer within your current ecosystem.

With more than 30 Fortune 500 clients, Incentify has passed every rigorous audit and security check.

Even if you're looking into a highly regulated location around the globe or expanding business to a new location, you'll be safe with Incentify's frictionless tools built for the most regulated industries, plus Incentify's data residency on two continents. That way, you meet the most demanding global compliance and privacy requirements while protecting the valuable information that drives your business forward.

Confidential data throughout the entire process.

Without the right systems and backups in place to effectively discover and reduce risk, the costs and time spent cleaning up messes can quickly spiral out of control. Incentify employs industry leading protection, leveraging a resilient database architecture with data encryption backed by a Key Management System.

A Superior Infrastructure

Incentify's cloud network infrastructure and data centers produce the highest possible standards of security:

-  SLA commitment to 99.95% availability
-  SOC 1, SOC 2, SOC3 compliance
-  FedRAMP and FIPS compliance
-  ISO 9001, ISO 27001, CIS, and additional compliance

Incentify provides eSignature of transfer documents with all connections occurring over HTTPS to the DocuSign REST API in addition to all documents being stored using AES-256 encryption.
