

ProPlay®

by Schmitz Foam Products

A SHOCK PAD THAT HAS IT ALL

ProPlay delivers the lasting performance you can expect from a well-established shock pad. Depending on its application the pad provides the right balance between a solid underfoot (vertical deformation), user comfort (shock absorption) and player safety (impact attenuation).

What makes the ProPlay shock and drainage pad really stand out is the fact that it offers the ultimate combination of all desired shock pad characteristics combined with superior drainage.

These characteristics make ProPlay truly unique through which it can add tremendous value to your artificial grass project.

PROPLAY ADVANTAGES AT A GLANCE

1. Circularity is key:
 - Produced from post-industrial recycled foam
 - Can be reused or recycled at the end of life of the field
2. 25 year warranty for the owner of the field
3. Easy and fast installation under all weather conditions
4. Systems tested with major artificial turf producers
5. In addition to the excellent vertical water flow capacity, ProPlay can also be delivered with outstanding horizontal drainage properties
6. Certified according to DIN 18035-7 / EN 15330 / DIN Spec 91335 / FIFA / FIH / World Rugby etc.

WE ARE SCHMITZ FOAM PRODUCTS

WE ARE PROPLAY

The Schmitz company is a fourth generation family business that was established in 1935 in the Netherlands. Foam has always played an important role in our business.

The first ProPlay was produced in the early 90s. It is the only shock pad that combines top-performance with superior drainage capability. The key focus of Schmitz Foam Products lies on combining sports performance and player safety for artificial grass systems.

FOAM RESIDUES GET A PURPOSE

MADE FROM TOP-QUALITY FOAM

ProPlay is made of closed-cell crosslinked polyethylene foams (XPE) that were originally produced for a different purpose in various industries where quality and product performance is key.

Schmitz Foam Products combines these foams with extensive knowledge about the material, stringent quality monitoring systems and well-defined production processes into a shock pad that delivers the required sports performance, player safety and field drainage.

APPROVED ACCORDING TO (INTER)NATIONAL STANDARDS

Besides our stringent internal processes our products' quality is also approved according to the following international and national standards:

- ESTC Performance Guide for Shock Pads
- NEN-EN 15330-1
- NEN-EN 15330-4
- Netherlands: NOC-NSF regulations
- Germany: DE DIN 18035-7 standard
- France: NF P90-110 standard
- Italy: LND regulation

THE MOST SUSTAINABLE SHOCK PAD AVAILABLE

When a ProPlay shock pad is no longer needed for its original application, the material can always be reused in another sports field or playground.

When it is not possible to find a new use for the original shock pad it can be returned to Schmitz Foam Products. There it will be recycled to produce a new high-quality shock pad. A nice circular process of which we are proud!
