WeeDeliver

Compliant Cannabis Delivery Management Platform

SERVICES

Customer Experience, Strategy, Technology, Data

SECTOR

Canna-tech

TECHNOLOGY

Mobile Web Application

Weedeliver is a white-label delivery management solution for cannabis businesses. The technology provides a mobile application for both drivers and customers to facilitate the purchase of marijuana.

▶ CHALLENGES / OBJECTIVES

The cannabis industry is an incredibly capital intensive and regulatory burdensome industry. With growing demand for cannabis delivery, not all dispensary operators have the ability to develop compliant technology to foster their consumers on-demand purchasing behaviors.

▶ SOLUTIONS

- **Weedeliver is an in-house product developed by Transcend Digital.**

- Consumer App - Integrated with real-time order tracking facility for consumers. It allows your customers to place orders seamlessly by adding products to cart in an instant. Let your clients track and pay through cards or by cash-on-delivery, so your client's won't worry about delivery anymore. As soon as an order is placed, the consumer will be receiving an sms notification.

- Driver App - Ease your team with driver-app that allows smart support to achieve timely deliveries through route optimization and intelligent parcel allocation. Integrated with smart order assignment and push-notifications, it keeps the delivery team aligned with their targets.
