

## Who we are

Agile Rising was created to provide our clients with highly-experienced, world-class enterprise transformation consultants and coaches. We have some of the most experienced Agile Coaches in the world – with decades of experience working with and in some of the largest companies and government agencies. We specialize in leading Digital and Agile Transformations, SAFe, Business Agility, Lean Portfolio Management, Product Management, and Technology Business Management. We help create a strategy for your organization, provide the coaching needed to successfully implement that strategy, and help your organization sustain the transformation on your own.

We combine expertise in software and product development with experience in senior operational and business leadership, portfolio management, sales, marketing, and finance and deep expertise in today's leading Agile and Product Management frameworks. Which is necessary for achieving true Business Agility across the organization. We can provide the guidance and mentoring to leaders and teams across the organization to drive enterprise-Agile transformation and DevOps transformations.

Agile Rising will be your partner in leading your large-scale transformation, guiding you as you adopt the Scaled Agile Framework and shift to a product-centric approach, while providing the executive-level coaching and training you need.

# Your Path to **Enterprise Agility**

Transforming the world

**One organization at a time**

## Our Solutions

Consulting, coaching, and training for organizations embracing enterprise-scale Agile, DevOps, Lean and TBM transformations.

### Agile Transformation

We know that an Agile transformation is an undertaking that offers a number of challenges. At Agile Rising we offer solutions that have been proven through practice and thoughtful experimentation. Our team brings real-world experience to help you achieve Agility. Our approach is context-driven and based on your needs. Agile Rising focuses on helping to optimize your organization with the latest research into organizational effectiveness. We want to help you achieve Agility as it pertains to your work. Our transformation consultants help define a strategy and build a corporate design, roll-out plan, tooling, and framework selection tailored to your specific organizational needs.

### Merging TBM and Agile

At Agile Rising, we believe the best way to implement TBM is in conjunction with an Agile transformation. This approach modernizes both the IT delivery and innovation model and the Financial controls and reporting tools at the same time and in complimentary ways. Even more importantly, organizations should not view these transformations as separate initiatives

### Lean Portfolio Management

Changing enterprise investment decisions, budgeting processes, organization design, and business architecture can inspire anxiety and confusion when questions and concerns are not addressed properly. These are complex topics that require answers to tough questions, alignment across stakeholders, and facilitation of key conversations. With our experience in agile budgeting, Technology Business Management, agile contracting, and managing portfolios of large strategic initiatives, we can help guide your organization to a solution that works for you.

### Value Stream Management

The future of large-scale digital and Agile transformation is Value Stream Management — the practice of focusing on increasing the flow of business value from customer request to customer delivery. Complement your journey towards business agility by first understanding flow and value stream management. It is a systematic approach to measuring and improving flow and helps organizations shorten time-to-market, increase throughput, improve product quality, and optimize business outcomes.

### Lean Agile Leadership

Agile Rising focuses on helping to optimize your entire organization with the latest research into organizational effectiveness and innovative management practices. Our experienced transformation consultants help to define a strategy and build a corporate design, roll-out plan, tool and framework selection tailored to your specific organizational and business needs.

### Agile for Government

At Agile Rising, we have deep experience helping multiple federal agencies, including NASA, the VA, and the FAA, successfully adopt the Scaled Agile Framework (SAFe®) and thought leadership in Agile transformation within the Government. Our team helped develop the SAFe for Government course and GAO Agile Guide. We are long-time contributors to the SEI Agile Collaboration Group and have presented at the annual Inter-Agency Agile Seminar on Agile contracting and vendor management.
