

# A Virtual Waiting Room that Digitizes Paper Intake, Prep, and Check-in for Patients

**120K**

HOURS of unnecessary waiting room time every year (per 100 providers)

**20**

PERCENT of patients switch providers because of long waits

**40**

PERCENT of patients are delaying non-COVID care

## A New Digital Operating Model

Retail and service industries are reimagining the way they serve customers. Healthcare providers need to do the same for patients that seek care for conditions beyond COVID-19, and that strategy begins in the waiting room. Lifelink Systems conversational chatbots provide a virtual waiting room experience that delivers a contactless, seamless, and safe experience for patients and care teams.

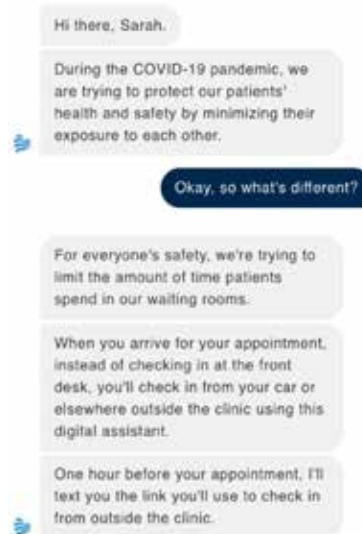

## Virtual Waiting Rooms at Banner Health

“Banner Health Innovates with Lifelink Systems Chatbots to Enable Virtual Waiting Rooms for Telehealth and In-Person Appointments”

Press Release May 14, 2020
