

## Getting started with gita<sup>mini</sup> robot

For the initial startup you need a Wi-Fi network (have the network name and password available) and a Bluetooth enabled mobile phone.

### 1. Charge gitamini robot for 10 minutes

Remove the charger from the accessories tray. Plug the charging cable into the charging port at the back of gitamini robot and the power cable into a wall outlet.

### 2. Install the mygita™ app and create your account

Download the mygita app from the App Store or Google Play Store. Sign up and create your account. Check your inbox for an email with a verification code. After completing your profile setup, select “add” to register your new gitamini robot.

### 3. Power on gitamini robot

Press and release the power button above the charging port.  
The *Pair/Park* button will pulse while gitamini robot starts up.

### 4. Continue setting up the app

Using your phone, scan the barcodes to the right.

### 5. Follow the instructions in the app to finish setting up your gitamini robot

Should you have trouble, please contact **Customer care at 1-800-791-0843.**

Single use only

## Your first walk with gita<sup>mini</sup> robot

To get started, touch the **Pair/Park button**. gitamini robot will pair with you, stand up, and self-balance. It is ready to follow.

Turn around and walk away. gitamini robot will follow you.

To end your walk touch the **Pair/Park button** again. gitamini robot will stop following you and sit down to park.

*To continue your journey with gitamini robot,  
make sure to read the user manual.*
