TEST MONITOR

A simple, revolutionary approach to software testing.

With our next-level, cloud-based software testing software, you'll get a clearly structured test management process that makes even complex IT projects more straightforward and comprehensible.

61% of projects fail because the goals are unclear or because the end users are not involved.

*Source: The Standish Group

If you can provide structure to your testing approach and test software performance with your users, you'll achieve greater quality results.

Our mission is ...
It's our mission to help structure your journey through software testing.

Our customers are ...
- Test Managers
- IT Project Managers
- QA Managers
- Release Managers
- IT Consultants
- Software Developers
- Students

Who We Are
Once upon a time in 1997, we started CEPO, a test consulting agency. From there, our TestMonitor testing software was born, which has grown and evolved into one of the most user-friendly online test tools on the market.

With more than 20 years of experience in software testing, TestMonitor has proven that insight into the quality of software is the key to success.

By the numbers

1,865 projects

55,020 issues

381,525 test cases

10,837 users

445,264 test results

Integrations / Compatibility
TestMonitor plays well with others. Easily integrate our software with your favorite apps, such as Jira, Slack, DevOps, Zapier, and more. Explore all integrations at www.testmonitor.com/integrations.

Compliance / Privacy Policy
TestMonitor aims to comply with strict data privacy and protection regulations and best practices. Our infrastructure is provided by TransIP Nederland, which is ISO 9001, 27001, 14001, NEN 7510, and PCI DSS certified. We are also in compliance with the GDPR.

Key features

Our testing software is simple yet robust and can fulfill the needs of teams in every stage and of every size.

Requirement and Risk Management
By defining the requirements and risks that matter most to you, you can get a grip on your project's ideal outcome.

Integrated Issue Tracker
Stay on top of every project and focus on the problems at hand. Including a full history trail, attachment handling, commenting, and time management system.

Extensive Reporting
Run your tests at any location, at any time. Watch live test results as they come in.

Custom Authorization
Use flexible configurations to manage and authorize your team and external stakeholders.

Extensive Knowledge Base
An excellent source of information about TestMonitor with tips, hints, and solutions to known problems.

Dedicated Customer Support
Fast, knowledgeable, and guaranteeing satisfaction, our customer happiness managers are here to help. No bots.
