

INTRODUCING THE NAVVIS VLX

NavVis VLX is a mobile mapping system designed for laser scanning which enables high-quality reality capture of complex buildings and construction sites.

Wearable

The NavVis VLX is a wearable mapping system designed to provide hands-free surveying and reality capture.

Two Lidar Sensors

The VLX contains two lidar sensors, and will capture both point clouds and high-resolution panoramas onsite.

Point Clouds

This new tool delivers survey-grade point clouds, and works well in challenging environments that have concentrated assets, like on construction sites.

ABOUT THE COMPANY

Existing Conditions' commitment to providing cutting-edge technology, industry expertise, and professional support means we adopt time saving technology whenever possible.

It is in that spirit that Existing Conditions would like to announce a new tool in our arsenal, the **NavVis VLX**.

"I'm really excited about the availability of virtual site visits and how the NavVis VLX is providing situational awareness to clients and their teams in a really user-friendly way."

KURT YEGHIAN
CEO, Existing Conditions
