

# Benefits of Getting a COVID-19 Vaccine

- ✓ **COVID-19 Vaccination Will Help Keep You From Getting COVID-19:**
  - A vaccine will be authorized or approved only if they make it substantially less likely you'll get COVID-19
  - Being vaccinated will help you protect those you love and care about
- ✓ **COVID-19 Vaccination Will Be A Safer Way To Help Build Protection:**
  - COVID-19 can have serious, life-threatening complications, and there is no way to know how COVID-19 will affect you. And if you get sick, you could spread the disease to friends, family, and others around you.
  - Clinical trials of COVID-19 vaccines first show they are safe and effective before any vaccine can be authorized or approved for use. The known and potential benefits of a COVID-19 vaccine must outweigh the known and potential risks of the vaccine for use
- ✓ **COVID-19 Vaccination Will Be An Important Tool To Help Stop The Pandemic:**
  - The vaccine will help us to re-open borders and better help the economy to recover.
  - Vaccines may help stop the spread of disease.

**None of the COVID-19 vaccines contain the live virus** that causes COVID-19 so a COVID-19 vaccine cannot make you sick with COVID-19.
