

Coronavirus Tips: Disposing of Household Waste

If you or a household member's **COVID-19 test is positive** or if you have been categorised as a **suspected case for COVID-19** and await your tests results, please follow the Ministry of Health guidelines as outlined below on how to dispose your household waste.

Steps on the disposal of household waste:

1. put in a garbage bag and tie when full
2. place this bag into a second bag
3. tie securely
4. keep separate from other garbage in your room in a suitable and secure place and mark for storage
5. please use gloves when removing garbage bags, handling, and disposing of household waste if available
6. always wash hands after handling or disposing of household waste

Continue to do this until you are re-tested and your results come back as **negative**.
