Upholstery Leather

## About the leather

---

OLDEN is a pure aniline leather of the saddle leather type, which has been tanned chromium-free. The comfortable greasy touch, which enables repolishing scratches and other signs of usage, is exceptional. Furthermore, the transparent finish emphasizes all natural characteristics and gives the leather its unique character.

Colour variations between hides and also in the same hide are characteristic for this low-tension, tight-grained leather. The unique appearance is primarily caused by the slight pull-up effect that is created in the more tense parts of the upholstery.
