FASTER
THAN
THE
SPEED
OF
TRUST.”

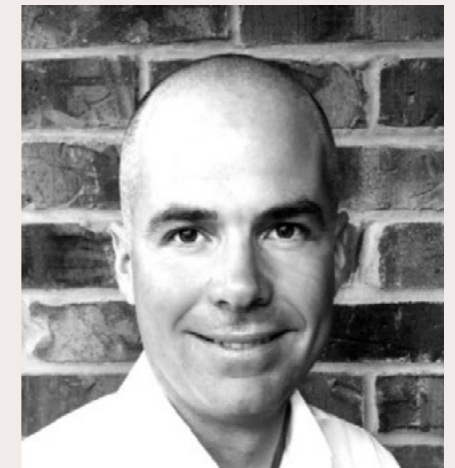

Erik Simins founded his first seven-figure company in 2011, which has since grown into a multi-national medical staffing firm that has exceeded \$10,000,000 in total revenue. His latest venture is a technology platform that verifies resume claims and credentials for consumer and enterprise markets, validating both quantitative and qualitative metrics.

Workwolf is a Canadian startup and employment-oriented online service that operates via its website and mobile applications. Incorporated on September 1st, 2017, the company's main focus is to obliterate resume fraud by verifying claims, credentials, and references indicated by candidates.

Having spent years in the hiring business, we know that resumes are slippery things. They are often influenced by a particular agenda, and can include tiny white lies.

Workwolf has developed first-class verification technology built to simplify the authentication of personal credentials for any professional individual, business, or institution that requires real-time credential verification. With our tamper-proof digital vault system, these credentials cannot be falsified or embellished by the data owner/candidate user.

Our Mission

HERE AT WORKWOLF, OUR MISSION IS TO OBLITERATE FRAUD AND INCREASE TRUST IN THE EMPLOYMENT PROCESS, MAKING IT EFFICIENT, EFFECTIVE, AND SEAMLESS FOR EMPLOYERS, RECRUITMENT AGENCIES, AND CANDIDATES. AFTER ALL, NOTHING IS FASTER THAN THE POWER OF TRUST.

Workwolf

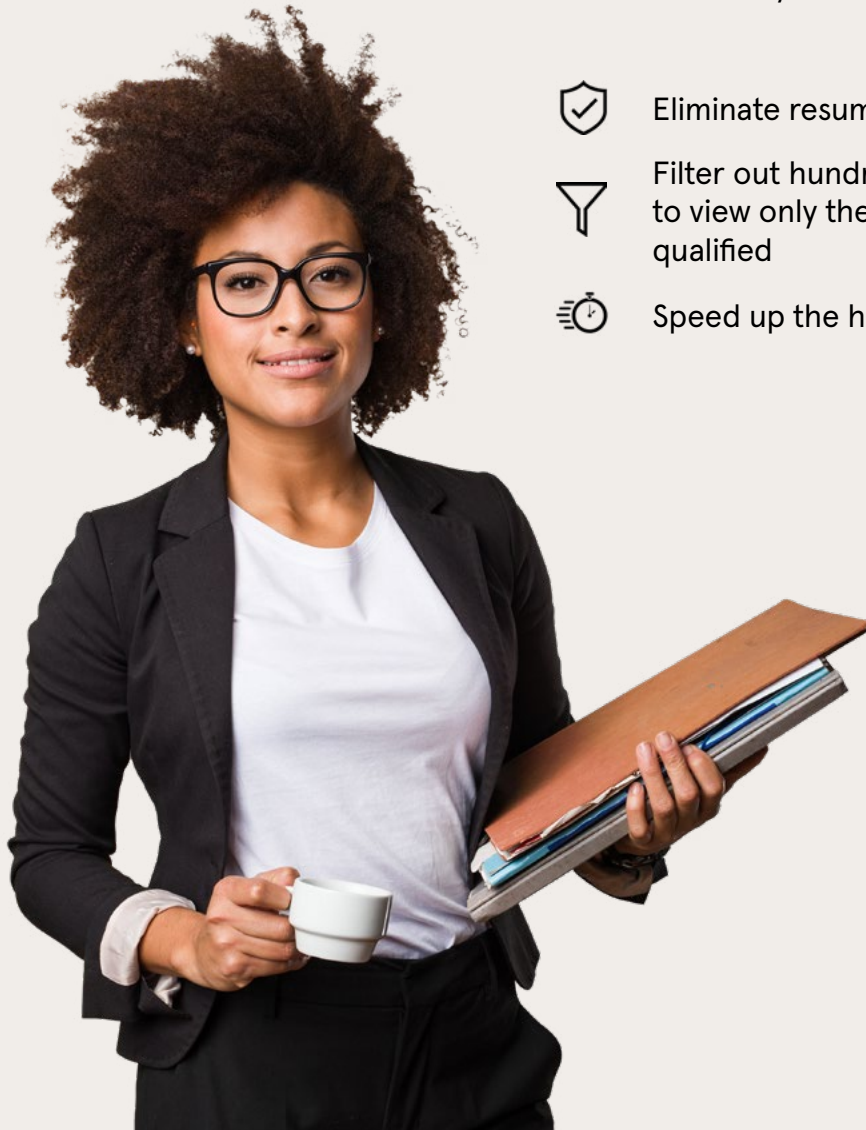

Unleash the Power of Truth
