/ Varibill Microsoft CSP Billing_

About Varibill:

Varibill is a cloud-based Billing-as-a-Service solution that aims to make CSP billing as easy and pain-free as possible.

It helps businesses to avoid the monthly manual and time-consuming process of trying to bill from big data dumps and multiple spreadsheets.
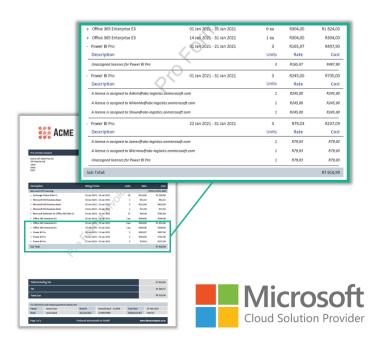

Developed for the South African market, Varibill is ideal for businesses of all sizes, from start-ups to giant enterprises.

Varibill allows you to:

›› Automatically collect all your billing data from multiple sources

›› Automatically bill all your products and services on one invoice

›› Bill according to actual usage and prorate

›› Provide flexible pricing and discounts

›› Manage contracts effectively

›› Avoid client disputes by allowing clients to drill down into the detail of line items

Varibill Advantages:

›› Grow a scalable business with a billing system that suits your business model

›› Eliminate time-consuming, error-prone and manual invoice processing

›› Invoice for anything, anytime

›› Collect your billing data from various sources

›› Invoice your clients for a mid-cycle upgrade / downgrade

›› Instantly update your accounting system when invoices are generated

›› No need to second-guess totals when calculations are done automatically

›› Send environmentally-friendly electronic, branded invoices to your clients

›› Your invoices always look professional and consistent

›› Securely store billing information to which only YOU have access

Industries:

Varibill is currently deployed inside these industry sectors:

›› Telecomms

›› Internet Service Providers

›› IT Solutions
