Learning management systems and training processes run parallelly to work contexts, keeping corporate training and people's core work environment separate.

Evaluation and assessment is detached from the training itself, typically taking place *after* the training program. Insights from analyses be applied only after a delay.

H.R. management have to deal with exceedingly complex data sets to provide meaningful content, feedback and analyses.

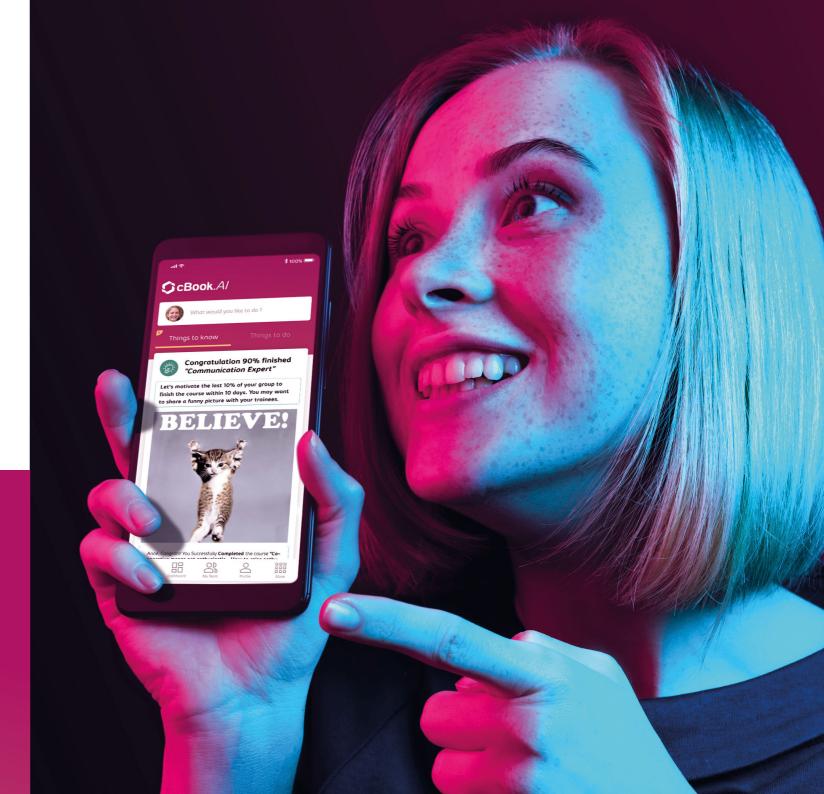

Short term learning objectives (e.g. onboarding for new products and services) and long term objectives (talent and career management) are addressed separately, causing logistical challenges.

... can be improved.

# Learning Feed, powered by AI.

**cBook.** *Al* introduces its Learning Feed to make learning, assessment and feedback seamlessly **integrated into work contexts.** 

- The content and recommendation feed for learners and trainers alike, **optimised for** the smartphone.
- · Provides analyses and recommendations based on multiple data sources, using AI.
- · Learning content is **smartly selected by AI**, addressing the learning goals.
- Enables **direct feedback** and coaching amongst the target group.

Learner

**Supremely personalised** and relevant content for an optimised learning experience.

Motivation and personal growth **through** ...

Trainer

**Push based advice** for a more engaging learner-trainer relationship.

Higher retention rate petween students and trainers **through ...** 

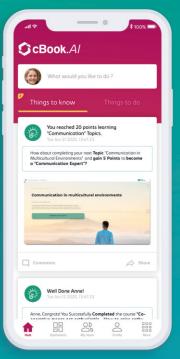

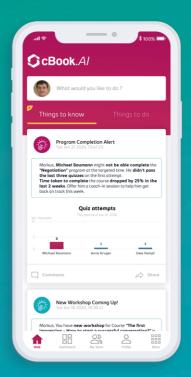

Management

Holistic and concise **overview** of organisational learning activities for **proactive measurements**.

Time-sensitive insights into vast learning performance data, through ...

... simple and immediately applicable recommendations for action.

# Learning Feed for learners and trainers.

For our *Learning Feed*, we use **Artificial Intelligence** and **Key Performance Indicators** to merge short and long-term goals into **meaningful learning recommendations** and calls for immediate action, for learners and trainers alike.

cBook.AI creates augmented learning experiences that are deeply interwoven with people's working contexts, allowing businesses and corporations to take a new approach to delivering training programs.

Learning carves one's own path into the future, forging us into unique individuals.

At **Learn Tomorrow**, we believe learning to be a deeply personal thing, helping us grow as individuals. Our learning technologies aim to strengthen the personal growth of users and their learning communities.

# cBook.Suite

Enliven your **training programme** with our cBook to provide your learners with a comprehensive eLearning experience, in web-based and **blended learning scenarios** alike. Prepare, complement and reflect on your classroom experience in one place: Your cBook.

Create a **stunning** and perfect multimedia **overview** for your learners in our **"Story-Mode"**. To get a short recap of the current page, simply flip the switch into the concise "Book-Mode".

**Enrich your programme** with attached bonus material and **empower** learners to reflect on the topics in **personalised notes,** adding value and context at the right place and time.

Through digital social activities (e.g. Community Voting, Collaborative Wordcloud, Activity Center) in their workbooks, your participants will not only be learning, but they will also actively engage with your content and your learning community.

# cBook.Creator

cBook Creator is an online Authoring System, which focuses on the trainer experience rather than backend administration. With its cloud-based asset management and storage system, zero installation requirements, programming free interface and powerful didactic extensions, the CREATOR maximises flexibility, creativity and interactivity, while minimising tedious administration.

- Cloud-based media management and storage fully online, no software installation needed.
- Comprehensive collection of extensions and customisation for extracting maximum didactical value from content.
- Seamless integration of standard didactics, multimedia and interactive components.
- Adjust slide behaviour, audio-visual elements and course completion parameters fully online.
- Asset manager for complete control over content and media.
- · Assessment tool for direct reporting within the LMS.
- · Review system for collaborative creation, editing and assessment.\*

# **Blended Learning with cBook.** Suite Different Learning phases, many features, one tool.

# Online Introduction

Combine training and multimedia to engage all the senses.

# cBook. Extensions

cBook offers a **unique** set of **extensions** that adds advanced **interactivity** to every course and module. Based on the advantages of web technologies, extensions carry **social and on-slide** interactivity beyond the standard.

## Calculations

Demonstrate theory with practical examples. Learners can test their know-how with interactive calculators.

## Wordcloud

Enables learners to collect ideas and impressions using our interactive Wordcloud.

# Hotspots

Learners can explore a picture or visual graph by clicking on various hot spots, revealing details and further content.

# Personal To-Do list

Offers the creation of a personal to-do list, which learners can then share with their trainer.

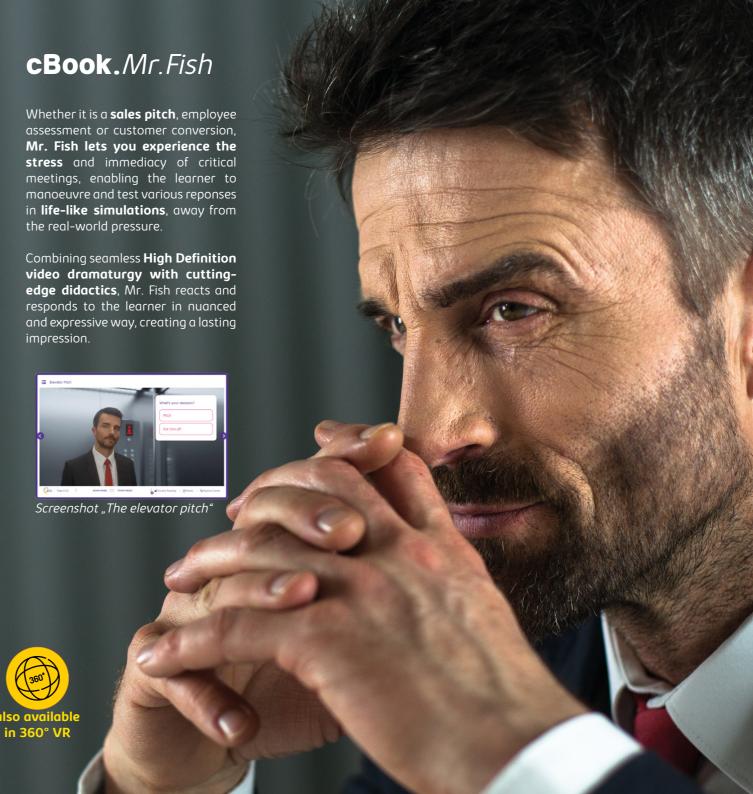

# Voting

Ask learners for their opinions on specific topics. They can then compare their vote with others in their group.

# **Pinboard**

Users can pin their notes and media here, sharing insights and suggestions with their group.
