Pelicanshipping case large model

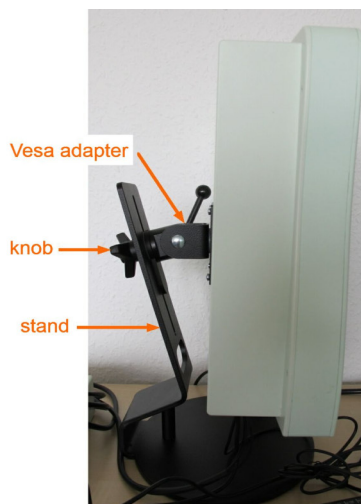

Pelicanshipping case medium model

A detailed manual how to place the components in the shipping cases is listed in the User Manual chapter: Appendix – Transport Packaging.

**NEURO PRAX® Therapist**

**Attention!**

Please mind the type label! You can only distinguish between Therapist and Trainer with the help of the type label and the sockets at the bottom side.

The Vesa adapter include all parts which are screwed at the Therapist. A locking ring is placed between Vesa adapter and stand.

Knob and Vesa adapter are unscrewable. Please mind to always enclose all parts!

### Power supply

The power supply of the Therapist occurs via power cord (2-pole).

### Keyboard and mouse

If available please always enclose the USB-PS2 adapter.

### NEURO PRAX® Trainer

#### Attention!

Please mind to enclose also all parts of the Trainer: Vesa adapter, knob and stand (see NEURO PRAX® Therapist).

### Connection cable Therapist-Trainer

## NEURO PRAX® Amplifier

The NEURO PRAX® Amplifier consists of:

- amplifier
- adaptor box
- ribbon cable/s
- optical cable/s
- external charger Mascot with power cord (2-pole)

### **Amplifier**

### **Adaptor box 32/64**

adaptor box 32

adaptor box 64

### **Ribbon cable**

The adaptor box is connected to the amplifier via ribbon cable/s.

### Optical cable

The optical cables are not fixed at the NEURO PRAX<sup>®</sup> amplifier and can be disconnected.

Please always enclose all optical cables (see image below).

### External charger

The Amplifier includes the external charger Mascot with power cord (2-pole). The batteries are built-in.

Accessories

The accessories of the NEURO **PRAX**<sup>®</sup> systems vary in a wide range. Please mind to enclose all accessories provided by neuroConn.

Trigger Module

Please mind to send the Trigger Module with all optical cables, USB connection and the charging device.
