

Making Simplified Billing a Reality

Streamline, Automate, and Simplify one of the largest expenses of your business.

► Consolidate

Improve operational efficiency by generating a fully-automated unified bill consolidating all healthcare and voluntary benefit premiums for each of your benefit providers.

► Reconcile

Ensure billing integrity and auditability through automation that validates that the correct amount is paid to each benefit provider, based on reconciliation against enrollment and provider invoice.

► Manage Payments

Create auditable electronic ledgers for each of your transactions, providing an easy way to make adjustments and submit payments with full integration with your ERP systems.

Designed for Security and Privacy

Data protection and privacy are of utmost importance to us. The AdminaHealth Billing Suite™ runs on a platform that was designed based on the most stringent security standards. In addition, AdminaHealth has joined an elite group of organizations in earning the HITRUST CSF Certification®, in addition to the validated NIST CSF Assessment.

Built for Enterprise Integration

Our billing platform utilizes all industry-standard data feeds such as enrollment, payroll, and vendor reporting, as well as custom interfaces for an organization. In addition, it enables integration with all enterprise applications.

Flexible Implementation Options

Each component can be deployed together, individually, or in any combination to meet your business needs.

Data Exchange Integration including Enrollments, Payroll, and Billing

via industry standard EDI, XML, API, or custom format

Your Rules Engine, Your Workflows

Enforces state and federal mandates and pricing & contractual agreements for all enrollment-based coverages

Bill Consolidation

One bill, one payment, covering all insurance products

Data Science & Analytics

Your data, our AI algorithms together driving smarter business decisions

Total Reconciliation

- Enrollment Reconciliation
- Invoice Reconciliation
