

vulog Fast Facts

The World's Leading Platform for Shared Mobility

Mission Statement Vulog, leader in shared mobility technology, is transforming cities by bringing shared and electric mobility across the world. We are committed to building a greener future, one city at a time.

Who We Are

We are the trusted partner of major players across various industries (automobile, energy, insurance, etc.) who are undergoing major transformations in order to achieve their digital, innovation and sustainability goals by integrating shared mobility (i.e. carsharing, moped-sharing e-scooter-sharing) into their global business strategy.

What We Do

We provide the technology solutions to launch and manage large electric fleets of shared vehicles (hundreds to thousands) in just 3 months. Our clients own the fleets and ensure vehicle maintenance, while Vulog ensures that all operations run flawlessly, both on the back and front-end (i.e. user experience, white label app). Vulog's unique global footprint, combined with its Artificial Intelligence proficiency, enables it to anticipate end-user demand unlike any other, while optimizing fleet balancing and ultimately contributing to the fight against climate change.
