

Achieving Quality Metrics: Utilizing CareSignal to Shrink Gaps in Care

Colorectal Screening Program In Action

Easily outreach large patient populations with CareSignal's colorectal screening program.

- Prompt individuals to respond with their screening status
- Offer individuals the opportunity to schedule a colonoscopy or request a non-invasive at-home test

Preventions and Screenings

Encourage regular screenings and preventative in-person or tele-health appointments. Educate and route individuals who are due for preventative services to scheduling resources.

- Breast Cancer Screenings
- Cervical Cancer Screenings
- Colorectal Cancer Screenings
- Lead Screening in Children
- Annual Wellness Visits
- Diabetes Ophthalmology

Medication Management

Support individuals with medication adherence and/or compliance post-discharge for new or frequently missed medications.

- Medication Reconciliation
- Post-Discharge
- Antidepressant Medication Management
- Medication Adherence and Tracking

Immunizations

Remind and educate individuals of the importance of regular or annual immunizations for themselves or their children. Provide resources for scheduling immunization appointments and capture self-reported immunization data for reporting.

- Flu Immunizations
- Childhood Immunizations
- COVID Immunizations
