

Astute Business Solutions FasTest Test Automation Tools Validated Integration with PeopleSoft 9.2

Save time, reduce costs, and minimize risk with FasTest Test Automation Tools. The FasTest solution is built to integrate with Oracle's PeopleSoft test framework to enhance and extend its capabilities. FasTest includes test automation tools, test management tools, defect management tools, and test reporting capabilities.

COMPANY OVERVIEW

Astute Business Solutions is dedicated to simplifying and maximizing returns on investment in enterprise business applications for companies of all sizes and across industries. Its mission is to help clients transform their businesses through innovative, practical, and cost-effective methods with Oracle enterprise business applications—both on premises and in the cloud.

INTEGRATION OVERVIEW

By presenting an online interface for test automation, FasTest simplifies the automated testing experience for both functional users and business analysts by enabling access from within the PeopleSoft environment. It also provides analytics that a test manager or a test lead can use to track and monitor the progress of automated testing; these results can be viewed in the PeopleSoft dashboard. The integrated defect tracking capability ensures that test logs and test defects are closely coupled to enable faster resolution of identified issues in the PeopleSoft application.

INTEGRATION DETAILS

The FasTest test automation solution is built for all PeopleSoft pillars and offers capabilities such as:

- **Automation.** Build and edit new test cases and business process tests, execute and schedule test cycles, and track and monitor test logs.
- **Defect management.** Create new defects for failed test scenarios, track the defects through their lifecycles, send email notifications, and generate defect reports by assignee, module, or test cycle.
- **Test management.** Manage and track test execution by user, date, or module; organize a test library in the underlying PeopleSoft Test Framework library; and manage upcoming test cycles.
- **Test reporting.** Get up-to-date live test reports on the testing dashboard, analyze test coverage across modules, identify testing logs during a test run, and review defects by module, assignee, or priority.

ORACLE
Validated Integration
PeopleSoft

Oracle Validated Integration provides customers with confidence that a partner's integration with an on-premise Oracle application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

TECHNICAL DETAILS

Partner Environment

- FasTest Test Automation Tools 6.0
- Oracle Database 19c Release 8

Oracle Environment

- Oracle's PeopleSoft 9.2
- Oracle's PeopleSoft PeopleTools 8.58
- Oracle Database 12c Release 2
- Oracle WebLogic Server 12c
