rewind

BIGCOMMERCE

What is Rewind?
Backups for BigCommerce

Rewind Backups is an app that will automatically back up your BigCommerce store every time you make a change — in real time. We put you in control of your data, so you can restore anything from a single image to your entire store. With Rewind Backups, you're ready for anything.

Lost Data Means Lost Sales

Rewind protects your business by maintaining a continuous backup of your entire store, making it easy to restore critical information for your BigCommerce store. If you make an error, become the victim of malware, or trust a buggy third-party app, Rewind Backups allows you to restore your data in no time.

The Old Way

- No store version history
- Hours lost to small mistakes
- Manual CSV exports
- No access or control

The New Way

- Automated daily backups
- On-demand recovery
- Unlimited backup history
- Full access and control

Peace of Mind with Rewind

With automatic backups, you never have to think about whether or not your BigCommerce store is protected — you already know. Rewind Backups lets you set it and forget it, so that when something goes wrong, you know where to go.

So Easy to be protected - Don't wait
May, 6 2021

What a great peace of mind having everything backed up in case something goes wrong. A few clicks and the app is loaded and that is it. I'm lucky that we haven't had to use it, but I have looked to make sure it works and its super easy to use.

Full Restore needed
April, 15 2021

We had a major issue with our site that needed to be restored over 3,000 items and Rewind and their team helped me restore everything....I highly recommend this application!!
