ANGLER 1.6

The Angler 1.6 machine is used to produce angle stock for flat oval and round flanges. Producing 90° angles from coil stock, the Angler 1.6 also automatically cuts to a desired length, and features complete PLC controls and touch screen for easy operation. The Angler 1.6 produces parts that are a perfect fit to be used with the Flanger 2.7 flanging machine. Optional TDC® and other special flanges.

FLANGER 2.7

The diverse Flanger 2.7 flanging machine produces either straight angle or hemmed angle round and oval flanges for a variety of uses. The Flanger 2.7 is filled with operator friendly features such as a touch screen PLC control and the ability to save and recall round and oval parameters for fast and easy production of duplicate parts.
