

Once a TSP or Purchased Carrier has submitted hook information through the mobile app, the Trip will update in real time with the data and photos captured.

Depending on the data validation (comparing what the TSP/PT personnel entered to what the Linehaul personnel entered) the dispatch may be automatically approved for departure or may require additional review and manual validation by Linehaul.

DOT Pre-Trip Inspection

Equipment Defects	No Defects
Driver Signature	

A TRIP STATUS:

- **Driver Hooked:** Dispatch information has been submitted by TSP/PT personnel, but a validation error occurred (numbers entered do not match what Linehaul entered)
- **Dispatch Approved:** Numbers entered by TSP/PT personnel match what was entered by Linehaul personnel

B TRAILER(S): Confirm hooked trailer(s) matches what was assigned. Click the captured picture to confirm trailer number.

C SEAL(S): The seal number entered by dispatcher upon creation of the trip and the seal number captured from the driver's photo are displayed side by side. A photo of the seal is also accessible here.

- If Linehaul Entry Error: Linehaul can override the seal number inside this form and manually flip to Dispatch Approved
- If TSP/PT Entry Error: Linehaul can communicate to TSP/PT through the Activity tab with validation error details

D PRE-TRIP: Defects noted by TSP/PT personnel will be noted here
