

From Aurora, the innovators in Filing and Storage, comes Gloss-Tek™ Antimicrobial powder coating, a new technology perfect for a wide variety of specialized applications.

Gloss-Tek Antimicrobial™ is a time-released antimicrobial powder coat that suppresses the growth of bacteria, algae, fungus, mold and mildew. Activated by moisture, this advanced technology uses silver ions encapsulated in the powder coat finish to kill offending microbes present on the product.

Gloss-Tek Antimicrobial™ Powder Coat

- Time-released antimicrobial powder coat finish
- Suppresses the growth of bacteria, algae, fungus, mold and mildew on the product surface
- Will not wear out or wash off over the life of the product
- Activates by moisture to kill offending microbes present on the product
- Reduces unpleasant odors, discoloration and deterioration caused by microbes on the product
- Available for Aurora Shelving, Aurora Mobile, and Aurora Times-2 Rotary Cabinets

The Science Behind the Product

The chemistry behind Gloss-Tek Antimicrobial is proven. Independent laboratory tests conducted by NAMSA* used samples of conventional product versus Gloss-Tek Antimicrobial product and established very significant inhibition of potential product damaging microbial growth.

*NAMSA North American Science Associates

Proform™ for Wire Shelving

Proform is an economical solution for high humidity or wet applications. The carbon steel is treated with an iron phosphate base. A hybrid epoxy with an antibacterial agent is electrostatically applied over the treated surface.
