

APX was invented to remedy logistical inefficiencies in the distribution and receipt of deliverable assets across your enterprise.

Fits Your Specific Needs and Space

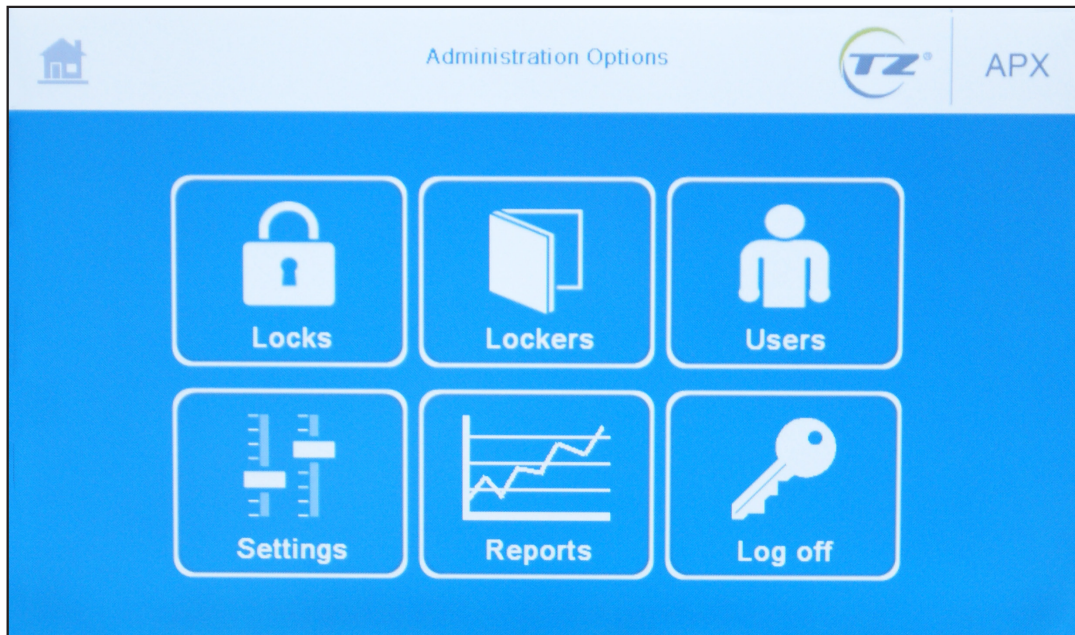

User Interface for "On Demand" Parcel Access

### User Benefits:

- 100% Accountable Delivery Cycle
- Automated Recipient Notification Upon Package Arrival
- 24/7 Accessibility "On Demand" for User Convenience
- Eliminates Missed Deliveries and Re-Delivery Attempts
- Rapid ROI through Labor Savings

# Intuitive System Administration

Easy access and updates of APX settings by authorized administrators.

The screenshot shows the 'Manage Lockers' interface. It has a header with a home icon, 'Manage Lockers', the TZ logo, and 'APX'. Below the header is a table with columns: Locker#, Size, SerialNumber, Lock, IsOccupied, State, Edit, and Delete. The table lists several lockers, including A1, A2, A3, B1, B2, B3, and C1. A mouse cursor is hovering over the 'Lock' column for locker A2. At the bottom, there are navigation arrows, '1 of 18', and an 'Add New' button.

Locker#	Size	SerialNumber	Lock	IsOccupied	State	Edit	Delete
A1	Medium	00 00 00 11 98		Occupied	In Service	Edit	Delete
A2	Medium	00 00 00 12 0A		Empty	In Service	Edit	Delete
A3	Medium	00 00 00 14 98		Empty	In Service	Edit	Delete
B1	Medium	00 00 00 11 86		Empty	In Service	Edit	Delete
B2	Medium	00 00 00 11 A5		Empty	In Service	Edit	Delete
B3	Medium	00 00 00 14 A4		Empty	In Service	Edit	Delete
C1	Small	00 00 00 12 2A		Empty	In Service	Edit	Delete

Manage overall system or individual lockers to safeguard assets and optimize capacity.

The screenshot shows the 'Reports' interface. It has a header with a home icon, 'Reports', the TZ logo, and 'APX'. Below the header, there are tabs for 'Transaction Report' and 'Locker Summary'. There are filters for 'All', 'By Date', 'From', 'To', and 'Search'. A table below shows transaction logs with columns: User Name, Transaction Time, and Message. The table lists several transactions, including successful dropoff logins and cancellations.

User Name	Transaction Time	Message
johnl	7/5/2011 3:04 PM	Successful dropoff login, mail agent John Lyons
johnl	7/5/2011 3:05 PM	Selected locker size S
johnl	7/5/2011 3:05 PM	Dropoff transaction cancelled
johnl	7/5/2011 3:05 PM	Selected recipient Lee Sanders
johnl	7/5/2011 3:05 PM	Dropoff complete, locker number C2
johnl	7/5/2011 3:07 PM	Successful dropoff login, mail agent John Lyons
agent	7/5/2011 3:08 PM	Successful dropoff login, mail agent Mail Agent
agent	7/5/2011 3:08 PM	Selected locker size M

Auto-generated reports for daily logistics accountability.

The screenshot shows the 'Manage Users' interface. It has a header with a home icon, 'Manage Users', the TZ logo, and 'APX'. Below the header, there are search fields for 'First Name', 'Last Name', and 'Role'. A table below lists users with columns: Name, Role, Email or SMS Phone #, Edit, and Delete. The table lists several users, including Admin User, Mail Agent, and End Users. At the bottom, there are buttons for 'Delete All', 'Import Users', 'Add New', and navigation arrows.

Name	Role	Email or SMS Phone #	Edit	Delete
Admin User	Admin	Admin.User@gmail.com	Edit	Delete
Mail Agent	Mail Agent	Mail.Agent@gmail.com	Edit	Delete
John Lyons	Mail Agent	john@gmail.com	Edit	Delete
joe smith	End User	8632199678	Edit	Delete
Ben Jones	End User	8649745672	Edit	Delete
Lee Sanders	End User	8649079480	Edit	Delete
Phil Page	End User	8645327896	Edit	Delete
Anthony White	End User	8647896754	Edit	Delete

Import users via CSV file or add manually to maintain 100% census accuracy.

The screenshot shows the 'Email Settings' interface. It has a header with a home icon, 'Email Settings', the TZ logo, and 'APX'. Below the header, there are fields for 'SMTP Server Address', 'SMTP Port Number', 'Use Secure Network', 'Polling Frequency', 'From Email', and 'System Email'. There are also fields for 'User Name' and 'Password'. A section on the right lists 'Authentication Methods' with radio buttons for Automatic, PLAIN, LOGIN, NTLM, CRAM-MD5, DIGEST-MD5, and GSSAPI (Kerberos). At the bottom, there are 'Test' and 'Save' buttons.

Customize system parameters and workflow settings to your specific requirements.
