Robot Interface

Modula warehouses can interface with anthropomorphic robots using a "Robot interface kit" installed on the electrical panel for handling of electrical signals (3 from Modula to Robot, 2 from Robot to Modula). Modula WMS software includes an interface which uses a software communications protocol based on direct memory access to the robot's PLC (Siemens® PLC only) or socket server mode.

Maximum payload for all trays

Every model in the Modula Lift range can ensure the maximum payload for all tray sizes, irrespective of their width and depth.

Up to 2,200 lbs across the entire tray range
Up to 161.41" wide

Integration with Modula LIFT

Modula WMS software

Modula WMS is the ideal software for the management of any type of automated or manual warehouse. A perfect complement to the Modula Lift, it has been designed to interface with all types of ERP systems.

Integration with Modula SINTES1
