They Need To Be Set Up STAT!!!

Where do they need to be set up? Parking Lot? Under a Tent? The "New Normal"

Deploy a simple or sophisticated workstation anywhere, anytime in minutes.

850 lb ball bearing casters are engineered to easily move over any surface - even pavement and uneven sidewalks.

Arrive fully assembled - no tool assembly. Sets up *anywhere* in minutes!

Instant Privacy

Privacy booths or "T" Screens are all mobile and available writeable surfaces.

Mobile Screens with writeable surface

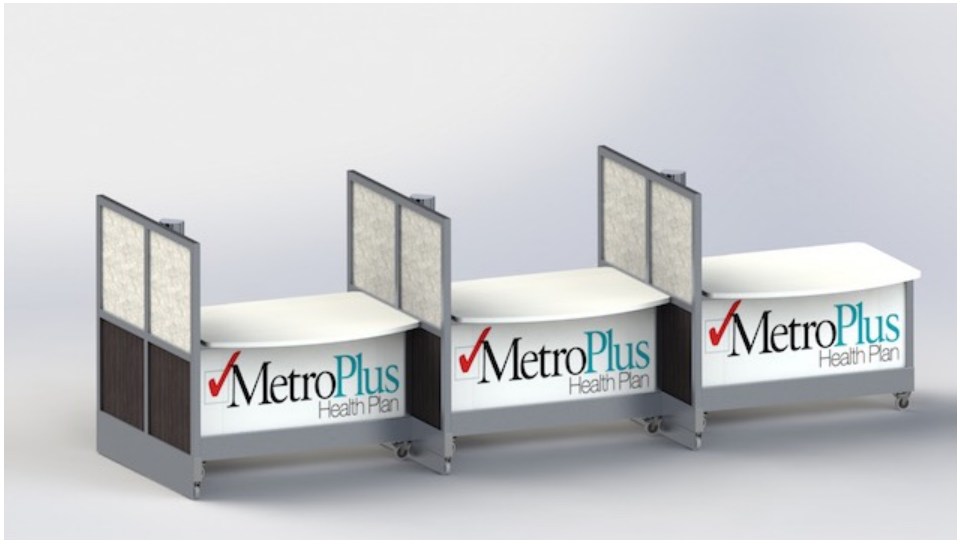

Social Distancing

Swiftspace workstations are engineered to be stand alone stations - NOT attached to one another.

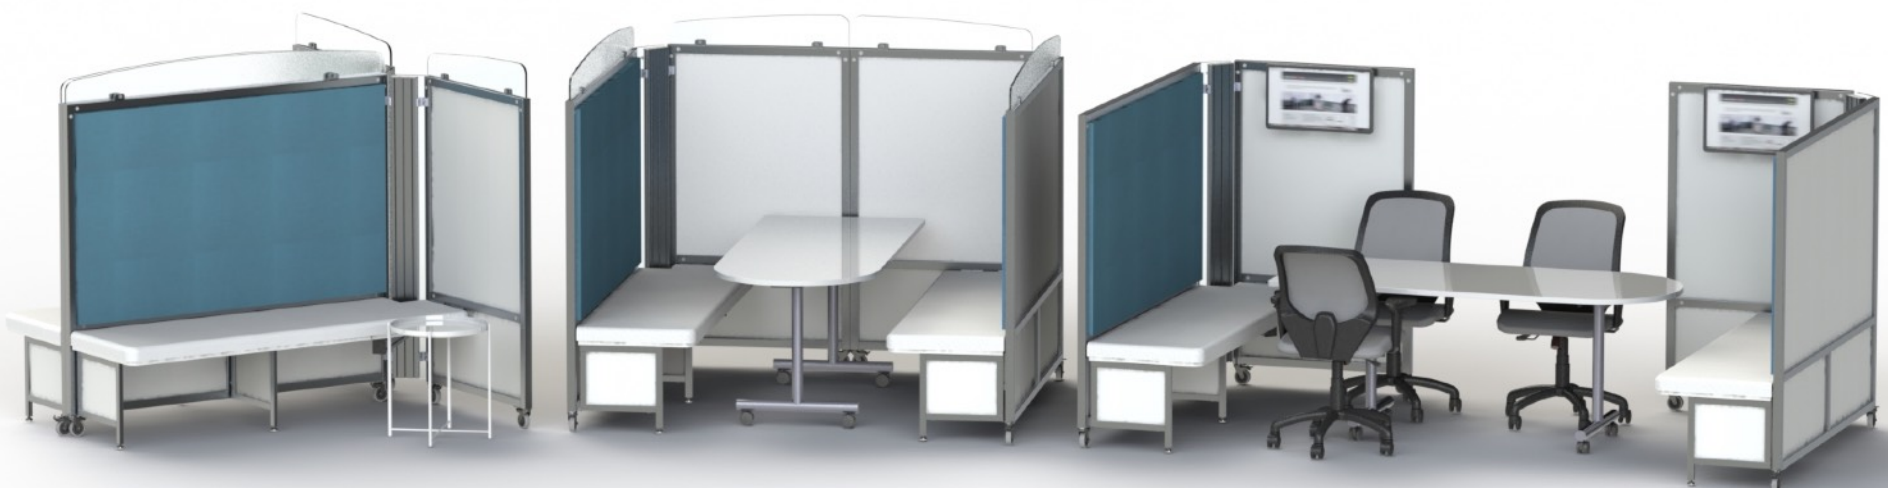

They deploy to the desired location - indoor or outdoor. They can abut each other or be separated, turned and placed anywhere they need to be placed to achieve the desired degree of social separation for healthcare concerns.

At the appropriate time, they can reposition for social interaction all in minutes, all without professional outside installation.

Service personnel can be kept to a minimum or eliminated.

Two examples of virtually instant modifications in social distancing. Above example of workstations are from the Solo Series and also available in the SHIFT series. Below the Rendezvous meeting spaces can adapt to multiple configurations.

A More Comprehensive Offering of Healthcare Related Workstations is available - Kindly Contact Us
