- Azure Managed Services

## Microsoft 365 Migration

### Blue Sky the Color of Imagination

Blue Sky the Color of Imagination approached New Charter Technologies to develop a plan to migrate their on-premise Exchange & files servers and legacy phone system, to a Microsoft 365 solution that included Exchange Online, SharePoint Online, and Teams. Providing a compliant solution, with full governance, was essential.

### Challenge

The ability to maintain security across multiple access sites was a critical element of the project. Blue Sky had transitioned to a 90 percent remote workforce following the COVID-19 pandemic. Protection of company intellectual property was key, given that employees could be working from any location, such as a home office, or a coffee shop.

The project needed to address four key areas:

1. Security – Identity Management
2. Data Loss Prevention and Rights Management
3. Performance
4. Ease of use

### Solution

New Charter Technologies – Leveraging their comprehensive experience in Microsoft 365 security and governance, coupled with their expertise in migration from multiple types of environments, New Charter Technologies was able to architect and implement a Microsoft 365 solution that addressed all of Blue Sky's objectives. The Microsoft 365 solution stack provided a dynamic solution with security and scalability to meet Blue Sky's future needs.

### Benefit

Client satisfaction with the access experience was extremely positive, due to the infrastructure solution architected by I.T. Responsive, a New Charter Technologies Company. I.T. Responsive's project management services coordinated Blue Sky, I.T. Responsive, and New Charter Technologies resources to deliver a migration strategy that optimized security and the end-user experience.

By embracing cloud-based technologies Blue Sky has been able to reduce costs, increase efficiency, and provide a superior employee experience.
