# Pairing the Zewa Blood Pressure Monitor with MyLife365 Smart Devices

1

After assigning a smart device to a member, select the Reminders application. You will receive two prompts, select “**ALLOW**” for both prompts.

**This step must be completed before pairing Bluetooth Devices.**

Allow **Reminders** to make and manage phone calls?

1 of 2

DENY ALLOW

Allow **Reminders** to access photos, media, and files on your device?

2 of 2

DENY ALLOW

2

Select the Bluetooth Icon\*.

Enter the password “**3651**” and select “**OK**”.

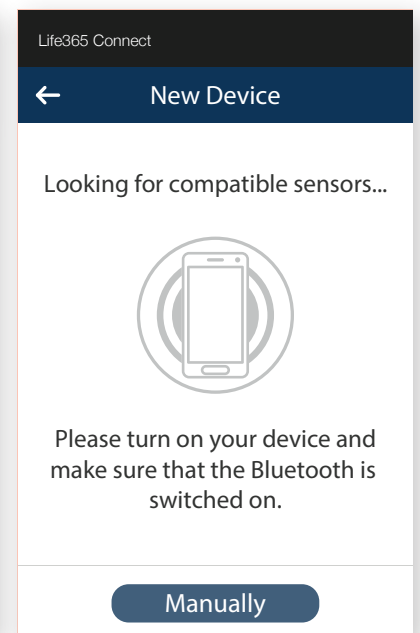

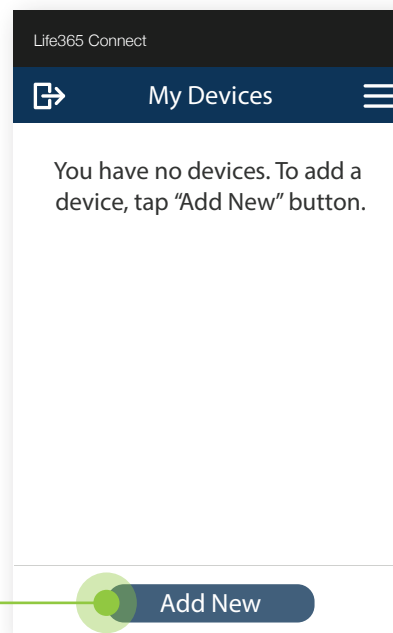

*\*the Bluetooth App Icon location may vary by device*

3

On the “**My Devices**” page, select “**Add New**” (A).

The smart device will search for the Bluetooth device.

# Pairing the Zewa Blood Pressure Monitor with MyLife365 Smart Devices

4

Press and hold the **START/STOP** button for 3-4 seconds.

Alternating squares will appear on the blood pressure screen.

5

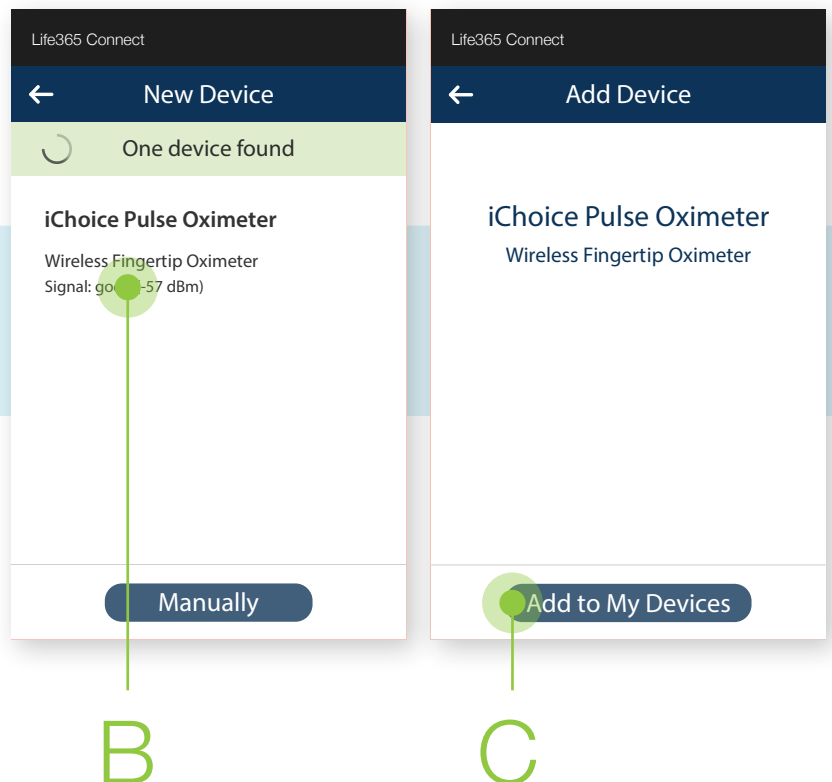

Once found, select the Bluetooth device **name** (B).

Select “**Add to My Devices**” (C).

*This is an example. Device name displayed will reflect the Bluetooth device the user is attempting to pair.*

6

Device pairing is now complete.

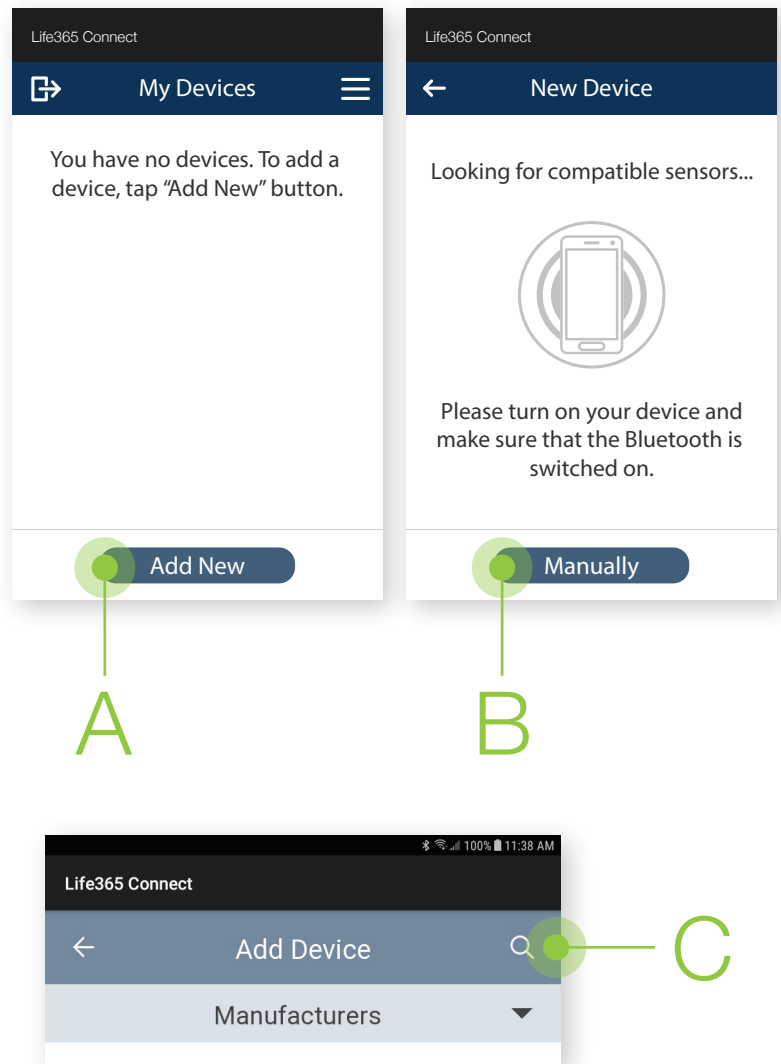

# MANUAL PAIRING:

## Difficulty pairing this device?

- 1 Try manually pairing the device by selecting “**Add New**” on the “**My Devices**” page (A), then selecting “**Manually**” (B).
- 2 Search for the device by Manufacturer by selecting the magnifying glass (C).
- 3 Select the device, then select “**Add to My Devices**”.

Device pairing is now complete.

Take a test reading with the device.  
Hub will announce the reading.

### NOTE:

The Reminders Application must be opened BEFORE opening the Bluetooth Application. If the Bluetooth Application is opened before the Reminders Application, a “**Choose Server Location**” error screen will display.

If this error screen is shown:

1. Exit the Bluetooth Application
2. Enter the Reminders Application
3. Accept both prompts
4. Re-enter the Bluetooth Application
5. Select the Refresh symbol (D).

**You can now complete device pairing.**
