PLS ONE DAY COURSE

Paediatric Life Support

A one day primer course focused on the first ten minutes of emergency paediatric care.

The Paediatric Life Support course covers the basics of emergency paediatric management, using the structured approach as taught on the three day APLS course.

Consistent with the latest clinical practice in Australia and New Zealand, information is presented in lectures, workshops, practical sessions and hands-on emergency scenarios over a single day.

All PLS instructors are leading practitioners in the field of paediatric care. Candidates also receive a comprehensive course manual, and are tested on key components.

The course covers:

- Basic life support
- Airway management
- Cardiac rhythm recognition and defibrillation
- Recognition of the seriously injured and seriously ill child

Outcomes include:

- Increased confidence, awareness, skills and ability to respond to basic paediatric emergencies
- Certificate issued upon successful completion

UPCOMING COURSE:

"Really fantastic course and great to reinforce basic skills"

"It has made an amazing difference to my confidence in dealing with sick children"

Candidate testimonials, 2013
