

Who is Medable?

Our mission is to get effective therapies to patients faster, reducing trial times by 50%.

Medable's platform for decentralized trials is unifying clinical drug development from trial design, recruitment, evidence generation, to submission.

Connect patient, sites and study teams in real-time

- Connect patients to trials remotely
- Enable site-based staff to conveniently screen, enroll, and enter patient data
- View real-time patient data and leverage next generation analytics

What makes us different?

Medable's modular Decentralized Trial Platform enables global studies and the success of patients and sites worldwide.

1 Global delivery

Trials are global and patients are too. We consider everything from a global perspective to optimize scalability and trial success.

2 Operational excellence

Implementation and delivery are core to our culture:

- Data is delivered in real-time
- UAT deadlines are met
- Single point of contact for the duration of the trial

3 Scientific expertise

Trials are fundamentally designed to prove your science. We partner across therapeutic areas to bring rigor to the latest approaches.

Biotech Case Study

During a recent Phase II study:

Using our modular Decentralized Trial Platform we were able to drastically reduce the overall cost of the trial by leveraging technology and human-centered design to optimize patient identification and enrollment, increase patient retention and streamline operations.
