

DealMaker Digital Payments

Elevate your capital raise with our digital payment options

DIGITAL PAYMENTS ON DEALMAKER

DealMaker's proprietary platform allows issuers to accept payments from a wide range of digital options such as credit cards, ACH, mobile banking and wire transfers - all with real-time payment reconciliation, investor matching and analytics. Real-time transaction information gives issuers the ability to make proactive and data-driven decisions that keep their raise on track to success. With greater control, issuers save time and money by eliminating delays and reducing unnecessary processing fees.

DEALMAKER PAYMENT ADVANTAGE

INCREASE INVESTORS AND CONVERSION

Offering a wider range of digital payment options ensures investors have a seamless funding experience adapted to their needs. Issuers can raise more capital by providing investors with a frictionless investing experience. Reduce investor drop-off and optimize conversion rates by providing the simplest investing experience!

SAVE TIME AND MONEY

Reduce fund settlement time with instant payment, eliminating lengthy transaction costs in the process while receiving up to minute information on investor transactions, subscriptions, and payment methods.

PREVENT FRAUD

DealMaker's secure platform is built to ensure fraud prevention, enabling issuers and investors to transact in a secure, quality tested environment.

- Online subscription agreement signing with secure payment audit trail
- Secure document archive available to investors
- Automated AML/PEP/ID checks

STREAMLINE RECONCILIATION

Real-time payment reconciliation enables issuers to match investor payment to subscription agreement in real time. Issuers save time and resources by using Reconciliation as a Service (RaaS) to streamline accounting procedures.
